Simians Cyborgs And Women The Reinvention Of Nature:

Simians, Cyborgs, and Women Donna Haraway, 2013-05-13 *Simians Cyborgs and Women* is a powerful collection of ten essays written between 1978 and 1989. Although on the surface simians, cyborgs, and women may seem an odd threesome, Haraway describes their profound link as creatures which have had a great destabilizing place in Western evolutionary technology and biology. Throughout this book, Haraway analyzes accounts, narratives, and stories of the creation of nature, living organisms, and cyborgs. At once a social reality and a science fiction, the cyborg, a hybrid of organism and machine, represents transgressed boundaries and intense fusions of the nature/culture split. By providing an escape from rigid dualisms, the cyborg exists in a post-gender world and as such holds immense possibilities for modern feminists. Haraway's recent book *Primate Visions* has been called outstanding, original, and brilliant by leading scholars in the field. First published in 1991.

Simians, Cyborgs, and Women Donna Jeanne Haraway, 2015. *Simians Cyborgs and Women* is a powerful collection of ten essays written between 1978 and 1989. The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13. *The Gendered Cyborg* explores the relationship between representation, technoscience, and gender through the metaphor of the cyborg. The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology, people and machines, which disrupt the power of science to enforce the categories through which we think about being human, male and female. Taking inspiration from Donna Haraway's groundbreaking *Manifesto for Cyborgs*, the articles consider how the cyborg has been used in cultural representation, from reproductive technology to sci-fi, and question whether the cyborg is as powerful a symbol as is often claimed. The different sections of the reader explore the construction of gender categories through science, the interaction of technoscience and gender in contemporary science fiction, film, such as *Blade Runner* and the *Alien* series, debates around modern reproductive technology such as ultrasound scans and IVF, assessing their benefits and constraints for women, issues relating to artificial intelligence, and the internet. **A**
