Understanding Children as Consumers

David Marshall, 2010-04-19 What drives children as consumers How do advertising campaigns and branding effect children and young people How do children themselves understand and evaluate these influences Whether fashion toys food branding money from TV adverts and the supermarket aisle to the internet and peer trends there is a growing presence of marketing forces directed at and influencing children and young people How should these forces be understood and what means of research or dialogue is required to assess them With critical insight the contributors to this collection take up the evaluation of the child as an active consumer and offer a valuable rethinking of the discussions and literature on the subject Features 14 original chapters from leading researchers in the field Each chapter contains vignettes or case examples to reinforce learning Contains consideration of future research directions in each of the topics that the chapters cover This book will be relevant reading for postgraduates and advanced undergraduates with an interest in children as consumers consumer behaviour and on marketing courses in general as well as for researchers working in this field

Technology's Child Katie

Davis, 2023-03-07 How children engage with technology at each stage of development from toddler to twentysomething and how they can best be supported What happens to the little ones the tweens and the teenagers when technology ubiquitous in the world they inhabit becomes a critical part of their lives This timely book Technology s Child brings much needed clarity to what we know about technology s role in child development Better yet it provides guidance on how to use what we know to help children of all ages make the most of their digital experiences From toddlers who are exploring their immediate environment to twentysomethings who are exploring their place in society technology inevitably and profoundly affects their development Drawing on her expertise in developmental science and design research Katie Davis describes what happens when child development and technology design interact and how this interaction is complicated by children s individual

characteristics and social and cultural contexts Critically she explains how a self directed experience of technology one initiated sustained and ended voluntarily supports healthy child development especially when it takes place within the context of community support Children s experiences with technology their screen time and digital social relationships have become an inescapable aspect of growing up This book for the first time identifies the qualitative distinctions between different ages and stages of this engagement and offers invaluable guidance for parents and teachers navigating the digital landscape and for technology designers charting the way

Oral Discourse and Education Bronwyn Davies,P. Corson,2013-11-01 Oral Discourse and Education examines spoken language as a field of study looking at the various ways in which we can both theorise the place of talk in education and examine the way talk is actually done in educational settings Given the centrality of literacy based practices in schools a book focusing on talk brings quite different and important perspectives to the study of education Talk is something that has all too often been devalued and taken for granted What becomes evident throughout the papers included in this volume is that talk is of central importance in establishing identities and the cultures in which those identities are located However because we are unused to reflexively examining the way we talk there is a serious disjuncture between what we believe talk should achieve and what can be seen to be achieved in actual talk in educational settings Anyone interested in teaching should read this book Becoming more aware of the centrality of talk and what it achieves is important both for enabling us to find ways to bring our ideals more in line with our practices and for being able to recognise and reflect on the ways our talk can be achieving things quite other than what we intend This book is relevant to teachers at primary secondary and tertiary levels and for researchers interested in spoken language in educational contexts
