Reconciliation Steve Sparks,2011 In a new ground breaking memoir Reconciliation A Son s Story the author reflects back on his father s war time experiences as the context underlying his own family dynamics and abuse Through the author s research and study of Post Traumatic Stress Disorder he comes to an understanding of his father s behavior and how this deeply impacted the family which eventually leads to healing Steve Sparks writes I owe my success in part to my Dad but not without a high price I call this collateral damage from living in a family culture affected by Post Traumatic Stress Disorder PTSD At that time men at war and coming home from war were too proud to share their stories and admit that anything in the way of mental illness was on the table for discussion My Dad was no different than thousands of veterans with similar symptoms especially those who were battle weary and emotionally damaged The children and wives and others close to these men would have to experiment and learn how to navigate our way through a terrible circumstance We did it well but not without scars that often show WWII has been in our past for well over a half century and most of the Greatest Generation passed on but the effects of PTSD carry forward just like bad genes We are still feeling the effects of WWII when PTSD was not studied and treatment was minimal As a result we are just beginning to address the realities of PTSD including diagnosis and treatment along with complete recovery from this unfortunate mental illness is now possible This is a true American story about father who went to war and came back changed by what he saw and by what he experienced How this impacted his family was profound yet unrecognized for what it was back then Today we know much more about the effects of PTSD on the individual but what about the family members closest to that person This story of living through a toxic environment yet ultimately coming to an understanding leads to the long sought reconciliation of a son with his father A very timely book this may help the thousands of families of veterans of our own current generation returning from their war experiences to better understand the effects of PTSD on the family About the Author Steve Sparks is a retired information technology sales and marketing executive following over 35 years beginning with the US Navy as a radioman in 1963 He Graduated with a BA in Management from St Mary s College Moraga California Steve is married to his soul mate and business partner Judy and lives on the Oregon coast He is the proud father of 3 grown daughters and 4 grandchildren and 1 great grandchild In addition to writing Steve s current passion and life work is mentoring and improving the education of K 12 kids including helping the responsible non profit agency Neighbors for Kids achieve sustainability

The Neurophysics of Human Behavior Mark E. Furman, Fred P. Gallo, 2000-06-22 How do brain mind matter and energy interact Can we create a comprehensive model of the mind and brain their interactions and their influences Synthesizing research from neuroscience physics biology systems science information science psychology and the cognitive sciences The Neurophysics of Human Behavior advances a unified theory of The Origins Of Neuro Linguistic Programming John Grinder, 2013-05-09 The Origins of NLP brings together the recollections and thoughts of some of the main protagonists from the very early days of NLP In 1971 Richard Bandler and Frank Pucelik were students at Kresge College at the University of California Santa Cruz They had a strong mutual interest in Gestalt Therapy Frank because of his traumatic time in Vietnam and because he had been working with some disaffected and drug addicted kids and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls seminal work The Gestalt Approach and Eyewitness to Therapy They started a local Gestalt group and ran 2 3 sessions a week collaborating and experimenting with the language of therapy They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors John Grinder to observe what they were doing in order that he would hopefully be able to deconstruct what they were doing that was so effective John was a professor of Linguistics and was instantly impressed with the work that they were doing He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model NLP or Meta as it was known then was born **Value Management** Mr Adam J Davies, Mr Roger H Davies, 2012-09-28 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved
