The Software Life Cycle Darrel Ince, Derek Andrews, 2014-05-20 The Software Life Cycle deals with the software lifecycle that is what exactly happens when software is developed. Topics covered include aspects of software engineering, structured techniques of software development, and software project management. The use of mathematics to design and develop computer systems is also discussed. This book is comprised of 20 chapters divided into four sections and begins with an overview of software engineering and software development, paying particular attention to the birth of software engineering and the introduction of formal methods of software development. The next section explores some aspects of software engineering that tend to get ignored in the literature, including functional programming, functional programming languages, and relational databases. The reader is then introduced to structured methods of software development along with software project management. The final chapter is devoted to software testing, which can be functional or nonfunctional. This monograph will be useful to software engineers and designers.

Multimedia and Internet Systems: Theory and Practice Aleksander Zgrzywa, Kazimierz Choroś, Andrzej Siemiński, 2012-08-16 Aleksander Zgrzywa, Kazimierz Choroś, and Andrzej Siemiński Eds. Multimedia and Internet Systems: Theory and Practice. During the last 20 years, we have witnessed a rapid development of Multimedia and Network Information Systems. What is even more important, the pace of change does not show any sign of slowing. When we look back, we see how many research projects that have originated at various universities or in research facilities are now part of our everyday life. This monograph offers the reader a very broad review of the most recent scientific investigations in that area. The book is a collection of carefully selected and the most representative investigations, solutions, and applications presented by scientific teams from several countries. The content of the monograph has been divided into four parts: 1. Multimedia Information Technology, 2. Information Systems Specification, 3. Information Systems Applications, 4. Web Systems and Network Technologies. The book is aiming to attract more scholars to work on the area of multimedia and Internet applications and to inspire the research community already working on the domain.
