Magnetism and Synchrotron Radiation Eric Beaurepaire, Hervé Bulou, Fabrice Scheurer, Kappler

Jean-Paul, 2010-03-12 Advances in the synthesis of new materials with often complex nano scaled structures require increasingly sophisticated experimental techniques that can probe the electronic states the atomic magnetic moments and the magnetic microstructures responsible for the properties of these materials At the same time progress in synchrotron radiation techniques has ensured that these light sources remain a key tool of investigation e g synchrotron radiation sources of the third generation are able to support magnetic imaging on a sub micrometer scale With the Fifth Mittelwihr School on Magnetism and Synchrotron Radiation the tradition of teaching the state of the art on modern research developments continues and is expressed through the present set of extensive lectures provided in this volume While primarily aimed at postgraduate students and newcomers to the field this volume will also benefit researchers and lecturers actively working in the field

Magnetism and Synchrotron Radiation E. Beaurepaire, 2001-08-28 The aim of this book is to provide both an introduction and a state of the art report on research into magnetism and magnetic materials Particular emphasis has been put on the contribution of synchrotron radiation in relevant experimental investigations Graduate students and nonspecialists will benefit from the tutorial approach while specialists will find the latest results that round off the material presented in the lectures

Magnetism: A Synchrotron Radiation Approach Eric Beaurepaire, Hervé Bulou, Fabrice Scheurer, Jean Paul Kappler, 2006-08-29 This volume contains the edited lectures of the fourth Mittelwihr school on Magnetism and Synchrotron Radiation This series of events introduces graduate students and nonspecialists from related disciplines to the field of magnetism and magnetic materials with emphasis on synchrotron radiation as an experimental tool of investigation These lecture notes present in particular the state of the art regarding the analysis of magnetic properties of new materials
