

Micro vs. Macro Economics Simplified

Microeconomics studies choices made by individuals, households, and firms. It's about supply and demand.

- MicroEconomics -

Consumer Choice

how individuals make decisions about what to buy and consume

Behavioral Economics

how psychological factors influence economic decision-making

Market Power

ability of an individual entity to control the market price of a product or service

Game Theory

how individuals or firms make decisions when they interact with others

Macroeconomics examines broader economic forces like inflation, unemployment, GDP growth, and monetary policy.

- MacroEconomics -

Business Cycles

periodic fluctuations in economic activity, like growth and recession

Monetary policy

Managing money supply using interest rates to influence the economy

Fiscal Policy

use of government spending and taxes to manage the economy

International Trade

exchange of goods and services between different countries

While microeconomics and macroeconomics are different, they are interdependent and complement each other.
