Maritime Rights Movement/Univ Microfilm Ernest R. Forbes, 1979-01-01 This book provides the first full account of a major social and political movement of the interwar years in Canada the campaign for Maritime Rights which erupted in the Atlantic provinces after World War I Ernest R Forbes traces the history of the movement from its origins in the decline in relative status and influence of the Maritimes that accompanied the rise of the West and the growing dominance of the Central Canadian metropolises Maritimers saw their political influence reduced the underpinnings of their economy especially in the critical areas of tariffs freight rates and subsidies whittled away and Canada defined in terms that seemed to exclude them Adopting a strategy characteristic of the progressive movements of the period they attempted through organization and agitation to restore their position Farmers fishermen manufacturers and organized labour articulated their demands through the provincial press boards of trade union locals educational conferences and mass delegations to Ottawa Professor Forbes challenges traditional assumptions in his emphasis upon a vigorous Maritime progressivism that transcended party affiliations All the political parties tried to use the protest movement but none had created it nor had it a specific founder or leader The agitation was in fact a spontaneous expression of the economic and social frustrations of the Maritime people Although their efforts were largely defeated by the conflicting interests of stronger regions and by the King government's adroitness in defusing protest through a policy of study and delay the author believes that the aroused Maritimers had succeeded in establishing their difficulties in the public's mind as a national problem

Canada and the First World War, Second Edition David MacKenzie, 2018-12-03 The First World War is often credited as being the event that gave Canada its own identity distinct from that of Britain France and the United States Less often noted however is that it was also the cause of a great deal of friction within Canadian society The fifteen essays contained in Canada and the First World War examine how Canadians experienced the war and how their experiences were shaped by region politics gender class and nationalism Editor David MacKenzie has brought together some of the leading voices in Canadian history to take an in depth look into the tensions and fractures the war caused and to address the way some attitudes about the country were changed while others remained the same The essays vary in scope but are strongly unified so as to create a collection that treats its subject in a complete and comprehensive manner Canada and the First World War is a tribute to esteemed University of Toronto historian Robert Craig Brown one of Canada's greatest authorities on the Great War World War One The collection is a significant contribution to the on going re examination of Canada's experiences in war and a must read for students of Canadian history

Politics and Ideology in Canada Michael Ornstein, Michael Stevenson, 2003-02-18 Winner of the Harold Adams Innis Prize Politics and Ideology in Canada examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society Using class and ideology as key concepts Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981 The surveys cover an exceptionally broad spectrum of political issues including social programs civil and economic rights economic policy foreign ownership labour relations and language issues and sovereignty A wide ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state But there was also widespread public alienation from politics Public opinion was quite strongly linked to class but not to party politics Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents State elites fell between these two though generally more favourable to capital The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs

Howell, 1995-01-01 *Northern Sandlots* is the story of the rise and fall of regional baseball on the northeast coast of North America Colin Howell writes about the social and economic influence of baseball on community life in the Maritimes and New England during the past century from its earliest spread from cities and towns into the countryside to the advent of television and the withering of local semi pro leagues after the Second World War The history of sport is an important feature of the new social history Howell discusses how baseball has been deeply implicated in debates about class and gender race and ethnicity regionalism and nationalism work and play and the commercialization of leisure Baseball's often overlooked connection to medical and religious discourse is also explored Howell begins with the game's earliest days when it was being molded by progressive reformers to meet what they considered to be the needs of an emerging industrial society He then turns to the interwar years when baseball in the Maritimes became strictly amateur revealing an emerging sense of community solidarity and regional identity The game flourished at the community level after the Second World War before it eventually succumbed to the new commodified and nationally marketed sporting culture that accompanied the development of the modern consumer society Finally Howell shows that fundamental changes in the nature of capitalism after the war and in the economic and social reality of small towns and cities hastened the death of a century long tradition of competitive

community level baseball Howell has written an informative and insightful social history that examines the transformation of Maritime community life from the 1860s to the late twentieth century

The Prairies and the Pampas, 1987-09 The Argentine and Canadian wheat economies starting from very similar positions in the late nineteenth century had diverged startlingly by 1930 In wheat production and export Argentina had stagnated and declined while Canada had surged to a position of world leadership This book explains how Canada had outpaced Argentina a country with better growing conditions and a much shorter haul to port The author finds the explanation in how differing government policies affected the paths the Canadian and Argentine wheat economies took The author's investigations center on several key questions In what ways did Canadian and Argentine policy makers and wheat growers attempt to improve their competitive positions by introducing efficient marketing systems research and agricultural education How responsive were the two political systems to questions of land tenure the role of immigrants and political representation in the wheat regions In sum how did quite different views on the role of the state affect the outcome The book is in three parts The first provides a basic political and economic overview of Argentine and Canadian history between 1880 and 1930 The second part analyzes and compares the two countries basic agricultural development policies In the third part the focus moves away from a topical emphasis and shifts to an analysis of major agricultural policy issues in the two countries The concluding chapter presents some final thoughts on the different paths of agrarian development in the two countries

The Golden Dream Ronald Stagg, 2010-04-05 In the early twentieth century a movement flourished in the Midwestern states bordering the Great Lakes to champion the St Lawrence route as the answer to easily transporting goods in and out of the centre of the continent Internal rivalries in the United States and Canada held back the project for fifty years until Canada suddenly decided to build a seaway alone pressuring the American Congress to co operate The building of the Seaway and its completion in 1959 involved engineering on an unprecedented scale and significant human dislocation During construction communities along the Great Lakes planned for increased prosperity but changes in transportation aging infrastructure and environmental problems have mean that the Golden Dream has not been fully realized even today This popular history chronicles the rise of one of the great engineering projects in Canadian history and its controversial impact on the people living along the St Lawrence River
