Mathematical Cranks:

Mathematical Cranks Underwood Dudley, 2019-07-11 A delightful collection of articles about people who claim they have achieved the mathematically impossible squaring the circle duplicating the cube people who think they have done something they have not proving Fermat's Last Theorem people who pray in matrices people who find the American Revolution ruled by the number 57 people who have in common eccentric mathematical views some mild thinking we should count by 12s instead of 10s some bizarre thinking that second order differential equations will solve all problems of economics politics and philosophy This is a truly unique Mathematical Apocrypha: Stories and Anecdotes of Mathematicians and the Mathematical Steven G. Krantz, 2020-08-03 **777 Mathematical Conversation Starters** John de Pillis, 2002 Illustrated book showing that there are few degrees of separation between mathematics and topics that provoke interesting conversations History of Mathematics: Highways and Byways Amy Dahan-Dalmedico, Jeanne Pieffer, 2020-08-03 A translation of the original 1986 French edition by Amy Dahan Dalmedico and Jeanne Peiffer both from Centre National de la Recherche Scientifique Paris this eminently readable book places the birth and development of mathematical activity in historical cultural and economic context The book offers an outstanding account for instance of how Arabs preserved Greek mathematics and extended it over an 800 year period from 400 1200 The large number of illustrations supports the text and contributes to a fine read Publisher Flies in the Ointment Mark Crislip, 2018-06-03 A carefully selected and edited compendium of the best of Dr Mark Crislip the Puswhisperer's blog posts from sciencebasedmedicine.org The sections have been edited for redundancy updated for 2017 and classified into themes Supplements and Complementary and Alternative Medicine SCAM can be classified many ways generally speaking alternative remedies are Possible mostly botanicals and herbal remedies There is nothing impossible that a given plant product will affect a given disease although often the provenance of a given herbal treatment is suspect Impossible the rest of CAM It will be equally impossible to cover every CAM practice so just a few are treated in depth The book is classified as follows What's the Harm A general discussion of why SCAM is bad for people animals and the environment Alt Facts Why Scientific Thinking is Hard A discussion of how and why our powers of logic are often powerless against SCAM Counting to Ten Statistics for the Rest of Us A somewhat technical section about statistical errors and fallacies and why interpreting the literature is difficult even for clinicians A must read for lovers of math Realm of the Possible A discussion of supplements including the evolution of my thinking on probiotics Rectum Damn Near Killed Em Probiotics and the Gut Microbiome Herbs and Supplements Eliminate the Impossible Impossible treatments their fallacies and risks Chiropractic Homeopathy Acupuncture Miscellaneous Quack Remedies Vaccines and Flu Woo The fallacies behind anti vaccination beliefs and why you should always get your flu shot *Gauss: Titan of Science* Waldo Dunnington, Jeremy Gray, 2020-08-03 **Carl Friedrich Gauss** G. Waldo Dunnington, Jeremy Gray, Fritz-Egbert Dohse, 2004-10-14 Classic biography of Gauss updated with new

introduction bibliography and new material *Musings of the Masters* Raymond Ayoub, 2004 The anthology is a collection of articles written by renowned mathematicians of the twentieth century The articles span roughly a century in time and a wide range in subject They are by mathematicians acknowledged by their peers as outstanding creators whose work has added richly to the discipline **A Mathematician Comes of Age** Steven G. Krantz, 2012-03 This book is about the concept of mathematical maturity Mathematical maturity is central to a mathematics education The goal of a mathematics education is to transform the student from someone who treats mathematical ideas empirically and intuitively to someone who treats mathematical ideas analytically and can control and manipulate them effectively Put more directly a mathematically mature person is one who can read analyze and evaluate proofs And most significantly he she is one who can create proofs For this is what modern mathematics is all about coming up with new ideas and validating them with proofs The book provides background data and analysis for understanding the concept of mathematical maturity It turns the idea of mathematical maturity from a topic for coffee room conversation to a topic for analysis and serious consideration **Sophie's Diary** Dora Musielak, 2022-08-11 Sophie Germain overcame gender stigmas and a lack of formal education to prove that for all prime exponents less than 100 Case I of Fermat's Last Theorem holds Hidden behind a man's name her brilliance as mathematician was first discovered by three of the greatest scholars of the eighteenth century Lagrange Gauss and Legendre In Sophie's Diary Germain comes to life through a fictionalized journal that intertwines mathematics with historical descriptions of the brutal events that took place in Paris between 1789 and 1793 This format provides a plausible perspective of how a young Sophie could have learned mathematics on her own both fascinated by numbers and eager to master tough subjects without a teacher's guidance Her passion for mathematics is integrated into her personal life as an escape from societal outrage Sophie's Diary is suitable for a variety of readers both young and old mathematicians and novices who will be inspired and enlightened on a field of study made easy as told through the intellectual and personal struggles of an exceptional young woman
