Mathematical Modelling Case Studies And Projects:

Mathematical Modelling J. Caldwell,Douglas K.S. Ng,2004-03-31 Over the past decade there has been an increasing demand for suitable material in the area of mathematical modelling as applied to science engineering business and management Recent developments in computer technology and related software have provided the necessary tools of increasing power and sophistication which have significant implications for the use and role of mathematical modelling in the above disciplines In the past traditional methods have relied heavily on expensive experimentation and the building of scaled models but now a more flexible and cost effective approach is available through greater use of mathematical modelling and computer simulation In particular developments in computer algebra symbolic manipulation packages and user friendly software packages for large scale problems all have important implications in both the teaching of mathematical modelling and more importantly its use in the solution of real world problems Many textbooks have been published which cover the art and techniques of modelling as well as specific mathematical modelling techniques in specialist areas within science and business In most of these books the mathematical material tends to be rather tailor made to fit in with a one or two semester course for teaching students at the undergraduate or postgraduate level usually the former This textbook is quite different in that it is intended to build on and enhance students modelling skills using a combination of case studies and projects

J. G. James,1990 An important component of mathematical education at all levels the use of mathematics to model real world situation In this book the emphasis is on developing models which provide a means to analysis and answer questions posed in practical settings It provides a pendium of case studies of mathematical models of varying degrees of sophistication and practicality Teachers and students of mathematical modelling will find it a rich source of examples ranging from insulating houses to basketball and from modelling epidemics to studying the generation of windmill power *Mathematical Modeling* Ellis Cumberbatch,Alistair Fitt,2001-10 This volume presents thirteen different case studies ranging from cooking of cereal to the analysis of epidemic waves in animal populations

Exploring Mathematical Modeling in Biology Through Case Studies and Experimental Activities Rebecca Sanft,Anne Walter,2020-04-01 Exploring Mathematical Modeling in Biology through Case Studies and Experimental Activities provides supporting materials for courses taken by students majoring in mathematics computer science or in the life sciences The book s cases and lab exercises focus on hypothesis testing and model development in the context of real data The supporting mathematical coding and biological background permit readers to explore a problem understand assumptions and the meaning of their results The experiential components provide hands on learning both in the lab and on the computer As a beginning text in modeling readers will learn to value the approach and apply competencies in other settings Included case studies focus on building a model to solve a particular biological problem from concept and translation into a mathematical form to validating the parameters testing the quality of the model and finally interpreting the outcome in biological terms The book also shows how particular mathematical approaches are adapted to a variety of problems at multiple biological scales Finally the labs bring the biological problems and the practical issues of collecting data to actually test the model and or adapting the mathematics to the data that can be collected

Mathematical Modelling of Sediment Transport and Deposition in Reservoirs - Guidelines and Case Studies / Modélisation Mathématique du Transport et des Dépôts de Sédiments dans les Réservoirs - Lignes Directrices et Études de Cas Cigb Icold,2021-06-27 As reservoir sedimentation has proven to be a serious problem in South Africa research in this field has been ongoing for more than 70 years This publication emanates from extensive research which has been undertaken over the past 30 years with the support of the South African Department of Water and Sanitation as well as the South African Water Research Commission A great

deal of information has fortunately also been obtained from China. Given the universal nature of hydraulic formulae it is not surprising yet gratifying that Chinese and South African data generally conform to the same mathematical relationships. This indicates that these relationships should be applicable in other countries as well. Much of the information contained here has been condensed from a more comprehensive publication. This ICOLD Bulletin follows on Bulletin 115 Dealing with reservoir sedimentation which gave guidelines for management of reservoirs to limit sedimentation. The guidelines on mathematical modelling of sediment transport dynamics in reservoirs in this document can be used during the planning and design of new dams as well as for the management of existing dams. Comme la sédimentation dans les réservoirs s'est avérée un problème sérieux en Afrique du Sud la recherche dans ce domaine est en cours depuis plus de 70 ans. Cette publicationmane de la recherche tendue qui a t men e au cours des 30 derni res ann es avec l appui du minist re sud africain de l eau et de l assainissement ainsi que de la commission sud africaine de recherche sur l eau. Un grand nombre d informations ont galemment t obtenues de la part de la Chine tant donn le caract re universel de formules hydrauliques il n est pas surprenant mais tr s gratifiant que les donn es chinoises et sud africaines se conforment g n ralement aux m mes relations math matiques. Ceci indique que ces relations devraient tre applicables dans d autres pays galemment. Une grande partie de l information contenue ici a t condens e partir d une publication plus compl te. Ce bulletin CIGB fait suite au bulletin 115 Trait sur la sédimentation dans les réservoirs qui a donn des directives pour la gestion des réservoirs en vue de limiter la sédimentation. Les directives sur la mod lisation math matique de la dynamique de transport des sédiments dans les réservoirs de ce pr sent document peuvent tre utilis es lors de la planification et la conception de nouveaux barrages et pour la gestion des barrages existants.

Product Lifecycle Management (Volume 4): The Case Studies John Stark, 2019-05-07. This book presents some twenty case studies showing how companies in different industry sectors and of different sizes make advances in Product Lifecycle Management (PLM). Like the author's previous volumes this book provides a valuable resource for those wishing to learn about PLM and how to implement and apply it in their companies. Helping readers to learn about implementing and benefiting from PLM, learn about good PLM solutions and best practice, improve their planning and decision making abilities, benefit from the lessons learned by the companies featured in the case studies, proceed faster and further with PLM, the book presents effective PLM solutions and best practices. At the same time the case studies included demonstrate how different companies implement and benefit from PLM. Each case study is addressed in a separate chapter and details a different situation enabling readers to put themselves in the situation and think through different actions and decisions. A valuable resource for PLM team managers and employees in engineering and manufacturing companies, the book is also of interest to researchers and students in industrial engineering fields.
