

The Philosophy of Mathematics Reconceptualized

1. The Scope of the Philosophy of Mathematics

In the previous chapter we entertained the hypothesis that mathematical knowledge is a set of truths, in the form of a set of propositions with proofs, and that the function of the philosophy of mathematics is to establish the certainty of this knowledge. Having found that this hypothesis is untenable we are forced to reconsider the nature of the philosophy of mathematics. What is the function and scope of the philosophy of mathematics?

As the philosophy of law does not legislate, or the philosophy of science devise or test scientific hypotheses—the philosophy of mathematics does not add to the number of mathematical theorems and theories. It is not mathematics. It is reflection upon mathematics, giving rise to its own particular questions and answers.

(Korner, 1960, page 9)

The philosophy of mathematics begins when we ask for a general account of mathematics, a synoptic vision of the discipline that reveals its essential features and explains just how it is that human beings are able to do mathematics.

(Tymoczko, 1986, page viii)

Priest (1973) boldly outlines the task as follows:

All the problems concerning the philosophy of mathematics can neatly be summarized by the question:

Question 0. What is pure mathematics?...

Firstly, what is meant by 'mathematics'? The only answer we can give without begging the question is 'That which is done and has been done for the last four thousand years by mathematicians.'...Knowledge of the nature of mathematics lies in an ability to do it.

[To answer question 0 we need to answer the following:]

Mathematics Education And Philosophy:

Mathematics, Education, and Philosophy Paul Ernest, 1994 Currently there is a great deal of interest in philosophical issues in the teaching and learning of both mathematics and science education In this book Ernest has collected together papers from the foremost researchers and practitioners in the philosophy of mathematics education and related areas together with a selection of papers from the International Congress of Mathematics Education held in Quebec in 1992 Throughout the outstanding feature of the collection is its multidisciplinary approach to the field of study This book is the second in Paul Ernest's Studies in Mathematics Education series *The Philosophy of Mathematics Education* Paul Ernest, 2002-11-01 Although many agree that all teaching rests on a theory of knowledge there has been no in depth exploration of the implications of the philosophy of mathematics for education This is Paul Ernest's aim Building on the work of Lakatos and Wittgenstein it challenges the prevalent notion that mathematical knowledge is certain absolute and neutral and offers instead an account of mathematics as a social construction This has profound educational implications for social issues including gender race and multiculturalism for pedagogy including investigations and problem solving and challenges hierarchical views of mathematics learning and ability Beyond this the book offers a well grounded model of five educational ideologies each with its own epistemology values aims and social group of adherents An analysis of the impact of these groups on the National Curriculum results in a powerful critique revealing the questionable assumptions values and interests upon which it rests The book finishes on an optimistic note arguing that pedagogy left unspecified by the National Curriculum is the way to achieve the radical aims of educating confident problem posers and solvers who are able to critically evaluate the social uses of mathematics *Towards a Philosophy of Critical Mathematics Education* Ole Skovsmose, 2013-03-09 In Nineteen Eighty Four George Orwell gives a description of different forms of suppression We learn about the telescreens placed everywhere through which it is possible for Big Brother to watch the inhabitants of Oceania However it is not only important to control the activities of the inhabitants it is important as well to control their thoughts and the Thought Police are on guard This is a very direct form of monitoring and control but Orwell also outlines a more imperceptible and calculated line of thought control In the Appendix to Nineteen Eighty Four Orwell explains some structures of Newspeak which is going to become the official language of Oceania Newspeak is being developed by the Ministry of Truth and this language has to substitute Oldspeak similar to standard English Newspeak should fit with the official politics of Oceania ruled by the Ingsoc party The purpose of Newspeak was not only to provide a medium of expression for the world view and mental habits proper to the devotees of Ingsoc but to make all other modes of thought impossible It was intended that when Newspeak had been adopted once and for all and Oldspeak forgotten a heretical thought that is a thought diverging from the principles of Ingsoc should be literally unthinkable at least as far as thought is dependent on words
