Mathematics Education For A Changing World:

Mathematics Education for a Changing World Stephen S. Willoughby, 1990 A discussion of mathematics curriculum and teaching methods based on the standards issued by the National Council of Teachers of Mathematics NCTM and National Council of Supervisors of Mathematics NCSM is presented The standards emphasize the connectedness of each of the branches of mathematics and underline the relationship of each branch to science and technology The standards also propose teaching estimation graphing statistics and probability at earlier stages than is now common This text turns these new standards into a practical reality for teachers and administrators Chapters include 1 Why Change 2 Recent Recommendations of Professional Groups 3 Implementing Recommendations 4 Problem Solving 5 Technological Developments 6 Connections and 7 Fostering Change KR *Equity in Mathematics Education* Constantinos

Xenofontos, 2019-10-01 Following in the steps of the socio political turn of the discipline *Equity in Mathematics Education Addressing a Changing World* emerged as a response of the editor and the chapter authors to the enormous changes that have in the last years occurred at a global level for example the ongoing war in Syria the political in actions of powerful nations to fight climate change the rise of far right parties in many countries around the world and so on In recent years massive migration waves from the Middle East have caused significant demographic changes to many European countries Canada and the US that are reflected in schools and classrooms These observations have led this book's contributors to reconsider the concept and or practice of equity and its related concept social justice and the role of mathematics education research in addressing and promoting a fairer world Contrary to other perhaps highly specialized books concerned with similar topics this book aims to provide a smooth yet deep introduction to those who are new to this research area *Equity in Mathematics Education Addressing a Changing World* contributes to the understanding of equity and its complex relations to mathematics education It is anticipated that it will support individuals in teaching educational research policy making and planning and teacher education in becoming more aware of the interplay between school mathematics and socio political issues that ultimately impacts the lives of learners and their communities teachers as practitioners and as citizens the wider society and the world as a whole Even though each chapter can be read independently of others an engagement with all chapters in this volume will provide readers with a solid holistic understanding of the research territory of equity and mathematics education *Science and Mathematics Education for 21st Century Citizens: Challenges and Ways Forwards*
