Mathworks For Nsw:

Power Electronic Converters Narayanaswamy P R Iyer, 2018-03-09 Provides a step by step method for the development of a virtual interactive power electronics laboratory The book is suitable for undergraduates and graduates for their laboratory course and projects in power electronics It is equally suitable for professional engineers in the power electronics industry The reader will learn to develop interactive virtual power electronics laboratory and perform simulations of their own as well as any given power electronic converter design using SIMULINK with advanced system model and circuit component level model Features Examples and Case Studies included throughout Introductory simulation of power electronic converters is performed using either PSIM or MICROCAP Software Covers interactive system model developed for three phase Diode Clamped Three Level Inverter Flying Capacitor Three Level Inverter Five Level Cascaded H Bridge Inverter Multicarrier Sine Phase Shift PWM and Multicarrier Sine Level Shift PWM System models of power electronic converters are verified for performance using interactive circuit component level models developed using Simscape Electrical Power Systems and Specialized Technology block set Presents software in the loop or Processor in the loop simulation with a power electronic converter examples

Modeling of Curves and Surfaces with MATLAB® Vladimir Rovenski, 2010-07-03 This text on geometry is devoted to various central geometrical topics including graphs of functions transformations non Euclidean geometries curves and surfaces as well as their applications in a variety of disciplines This book presents elementary methods for analytical modeling and demonstrates the potential for symbolic computational tools to support the development of analytical solutions The author systematically examines several powerful tools of MATLAB including 2D and 3D animation of geometric images with shadows and colors and transformations using matrices With over 150 stimulating exercises and problems this text integrates traditional differential and non Euclidean geometries with more current computer systems in a practical and user friendly format This text is an excellent classroom resource or self study reference for undergraduate students in a variety of disciplines

AC to AC Converters Narayanaswamy P R Iyer, 2019-06-03 Power electronic converters can be broadly classified as AC to DC DC to AC DC to DC and AC to AC converters AC to AC converters can be further classified as AC Controllers or AC regulators Cycloconverters and Matrix converters AC controllers and cycloconverters are fabricated using Silicon Controlled Rectifiers SCR whereas matrix converters are built using semiconductor bidirectional switches This text book provides a summary of AC to AC Converter modelling excluding AC controllers The software Simulink by Mathworks Inc USA is used to develop the models of AC to AC Converters presented in this text book The term model in this text book refers to SIMULINK model This text book is mostly suitable for researchers and practising professional engineers in the industry working in the area of AC to AC converters Features Provides a summary of AC to AC Converter modelling excluding AC controllers Includes models for three phase AC to three phase AC matrix converters using direct and indirect space vector modulation algorithm Presents new applications such as single and dual programmable AC to DC

rectifier with derivations for output voltage Displays Hardware in the Loop simulation of a three phase AC to single phase AC matrix converter Provides models for three phase multilevel matrix converters Z source Direct and Quasi Z source Indirect matrix converters a model for speed control and brake by plugging of three phase induction motor and separately excited DC motors using matrix converter a model for a new single phase and three phase sine wave direct AC to AC Converter without a DC link using three winding transformers and that for a square wave AC to square wave AC converter using a DC link models for variable frequency variable voltage AC to AC power supply models for Solid State Transformers using Dual Active Bridge topology and a new direct AC to AC Converter topology and models for cycloconverters and indirect matrix converters

Guide to Graphics Software Tools Jim X. Chen, 2008-12-17 The 2nd edition of this integrated guide explains and lists readily available graphics software tools and their applications while also serving as a shortcut to graphics theory and programming It grounds readers in fundamental concepts and helps them use visualization modeling simulation and virtual reality to complement and improve their work

Numerical Methods for Least Squares Problems Ake Bjorck, 1996-01-01 The method of least squares was discovered by Gauss in 1795 It has since become the principal tool to reduce the influence of errors when fitting models to given observations Today applications of least squares arise in a great number of scientific areas such as statistics geodetics signal processing and control In the last 20 years there has been a great increase in the capacity for automatic data capturing and computing Least squares problems of large size are now routinely solved Tremendous progress has been made in numerical methods for least squares problems in particular for generalized and modified least squares problems and direct and iterative methods for sparse problems Until now there has not been a monograph that covers the full spectrum of relevant problems and methods in least squares This volume gives an in depth treatment of topics such as methods for sparse least squares problems iterative methods modified least squares weighted problems and constrained and regularized problems The more than 800 references provide a comprehensive survey of the available literature on the subject

Inverters and AC Drives Narayanaswamy P.R. Iyer, 2024-12-26 Successful development of power electronic converters and converter fed electric drives involves system modeling analyzing the output voltage current electromagnetic torque and machine speed and making necessary design changes before hardware implementation Inverters and AC Drives Control Modeling and Simulation Using Simulink offers readers Simulink models for single multi triangle carrier selective harmonic elimination and space vector PWM techniques for three phase two level multi level including modular multi level Z source Quasi Z source switched inductor switched capacitor and diode assisted extended boost inverters six step inverter fed permanent magnet synchronous motor PMSM brushless DC motor BLDCM and induction motor IM drives vector controlled PMSM IM drives direct torque controlled inverter fed IM drives and fuzzy logic controlled converter fed AC drives with several examples and case studies Appendices in the book include source codes for all relevant models model projects and answers to selected model projects from all chapters This textbook will be a valuable

resource for upper level undergraduate and graduate students in electrical and electronics engineering power electronics and AC drives It is also a hands on reference for practicing engineers and researchers in these areas

Optimization—Theory and Practice Wilhelm Forst,Dieter Hoffmann,2010-07-16 Optimization is a field important in its own right but is also integral to numerous applied sciences including operations research management science economics finance and all branches of mathematics oriented engineering Constrained optimization models are one of the most widely used mathematical models in operations research and management science This book gives a modern and well balanced presentation of the subject focusing on theory but also including algorithmis and examples from various real world applications The text is easy to read and accessible to anyone with a knowledge of multi dimensional calculus linear algebra and basic numerical methods Detailed examples and counter examples are provided as are exercises solutions and helpful hints and Matlab Maple supplements The intended readership is advanced undergraduates graduates and professionals in any of the applied fields

Spherical Radial Basis Functions, Theory and Applications Simon Hubbert,Quốc Thông Le Gia,Tanya M. Morton,2015-05-13 This book is the first to be devoted to the theory and applications of spherical radial basis functions SBFs which is rapidly emerging as one of the most promising techniques for solving problems where approximations are needed on the surface of a sphere The aim of the book is to provide enough theoretical and practical details for the reader to be able to implement the SBF methods to solve real world problems The authors stress the close connection between the theory of SBFs and that of the more well known family of radial basis functions RBFs which are well established tools for solving approximation theory problems on more general domains The unique solvability of the SBF interpolation method for data fitting problems is established and an in depth investigation of its accuracy is provided Two chapters are devoted to partial differential equations PDEs One deals with the practical implementation of an SBF based solution to an elliptic PDE and another which describes an SBF approach for solving a parabolic time dependent PDE complete with error analysis The theory developed is illuminated with numerical experiments throughout

Spherical Radial Basis Functions Theory and Applications will be of interest to graduate students and researchers in mathematics and related fields such as the geophysical sciences and statistics

Machine Learning and Data Mining in Pattern Recognition Petra Perner,2015-06-30 This book constitutes the refereed proceedings of the 11th International Conference on Machine Learning and Data Mining in Pattern Recognition MLDM 2015 held in Hamburg Germany in July 2015 The 41 full papers presented were carefully reviewed and selected from 123 submissions The topics range from theoretical topics for classification clustering association rule and pattern mining to specific data mining methods for the different multimedia data types such as image mining text mining video mining and Web mining
