Matter Of Perspective:

The Power of Perspective Knut Mikjel Rio, 2007-05-01 Focusing on different forms of agency in North Ambrym social life the author demonstrates the potency of outsiders at different times and in different situations in Ambrym society This model challenges the premises of much Western thinking about reciprocity and suggests new directions in the analysis of Melanesian societies

The Share of Perspective Emmanuel Alloa, 2024-08-02 This book is a defense of perspectivism in the age of post truth At the crossroads of science art and philosophy it unearths a tradition that we must rediscover the point of view is not only what divides it is also what is shared Today perspective is associated with individualism and personal viewpoints But in an age of post truth the only robust answer to relativism lies in fact in a reappraisal of perspectivism In discussion with contemporary new realisms of various sorts this book makes a case why perspectivism alone can avoid us falling back into epistemological naiveté A journey into the history of optics art philosophy and social psychology this book unearths the forgotten tradition of *perspectiva communis* which makes perspective the vector of a common horizon This book argues that vision is never immediate Rather to see through is the key to understanding the perspectival operation We never see by ourselves all seeing must pass through something other than itself through the mediation and the detour of an apparatus or the witness of a third party Besides the theoretical framework for this new approach to perspective this book presents a series of case studies ranging from innovative interpretations of classical authors and key moments in the history of art from ancient painting *trompe l'oeil* and Brunelleschi's experiment in Renaissance Florence to the issue of perspective in the work of contemporary artists such as Robert Rauschenberg The *Share of Perspective* will be of interest to scholars and advanced students working in aesthetics phenomenology art history and the history of sciences

The Grammar of Perspective Christopher Woods, 2008-05-31 The so called Sumerian conjugation prefixes are the most poorly understood and perplexing elements of Sumerian verbal morphology Approaching the problem from a functional typological perspective and basing the analysis upon semantics Professor Woods argues that these elements in their primary function constitute a system of grammatical voice in which the active voice is set against the middle voice The latter is represented by heavy and light markers that differ with respect to focus and emphasis As a system of grammatical voice the conjugation prefixes provided Sumerian speakers with a linguistic means of altering the perspective from which events may be viewed giving speakers a series of options for better approximating in language the infinitely graded spectrum of human conceptualization and experience Woods is to be commended for establishing a new precedent for analyzing Sumerian grammar which will hopefully become a model for future studies of the language Paul Delnero Johns Hopkins University

The Poetics of Perspective James Elkins, 2018-10-18 Perspective has been a divided subject orphaned among various disciplines from philosophy to gardening In the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics James Elkins leads us to a new understanding of how we

talk about pictures Elkins provides an abundantly illustrated history of the theory and practice of perspective Looking at key texts from the Renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity That gradual transformation he observes has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky Hubert Damisch Martin Jay Paul Ricoeur Jacques Lacan Maurice Merleau Ponty and E H Gombrich The Poetics of Perspective illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it Rather than presenting perspective as a resonant metaphor for subjectivity a painter s tool without meaning a disused historical practice or a model for vision and representation Elkins proposes a comprehensive revaluation The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world *The Prism of Perspective*
