

The background of the image is a vibrant, abstract cosmic scene. It features swirling patterns of purple, pink, orange, and blue, resembling a nebula or a galaxy. Numerous small, bright white stars are scattered throughout the dark space. The overall effect is one of vastness and wonder.

Spirit over mind. Mind over  
matter. It's that simple.

## **Matter Over Mind:**

Intuition of Significance Albert Norton Jr.,2020-02-06 There is a big gap between the orthodox Christian understanding of reality and that of the default materialism of the culture We tend not to recognize the default perspective as coherent doctrinal and dogmatic in the same way religion is understood to be This is partly because of the tendency to describe one s views by what they are not rather than what they are To say I m not very religious for example is to say what one isn t not what one is The effect of this tendency is to obscure the metaphysical stance absorbed in place of religion leaving an illusory neutrality concerning spiritual truth Reality is the widest conceptual net we can cast The right first question is what constitutes all of reality Theism provides one answer materialism another We would do well to look critically at both This book traces the fault line between theism and materialism so as to follow the evidence where it leads evidence like the fact of being our incessant yearning our competing desires both for significance and insignificance and the subjective motivations we have with respect to beauty truth and morality all indicators of transcendent truth to which our physical surroundings point

**Forty Types of PROOFS of Actual Totality** Marcus Bergh,2014-05-07 The one world problem has been central to knowledge for ages Of many approaches none has resolved the problem With great increases in knowledge there is now sufficient ideas concepts and means to show a unified ultimate totality Actual Totality is a book whose proofs and detail provide the needed resolution The approach to unity is by forty types of proof from non existence to their combined sum It features those universals qualities continua kinds and varieties of actual totality whose proofs are most certain Certainty of proofs produces axioms that are most recognizable as laws Each type of proof has different laws whose integration and representation give excellent proof of actual totality Dependence on the observer observed relationship is the basis for relativity Dependence on the definite absolute quality of the human mind and person is the basis for the absoluteness seen in identity and self preservation Mind and matter are part of a continuum that is the basis and proof of actual totality Many other continuums make up actual totality including general and special mass energy length time static and dynamic The continua are dualities whose spectra form gradients It is these gradients that make up much of the detail and differential whose vertical integration proves actual totality The physical universe and the relative universe of civilization best human life and mind are large components of the general to special spectrum and varieties of actual totality There is massive interaction and potential to actual existence in and out of actual totality This occurs with increasing time In the near to mid term actual totality is stable and can be treated as a closed set In the far term both the actual and potential of actual totality undergo adaptation and alteration that best suits their existence with change With good representation an overview of the difference between actual totality as a stable and relatively exclusive world and potential changes in the long term become clear The many revolutions that accompany change and the role of language math proportions geometry design propelling and compelling forces that determine creation and evolution of life all reveal proofs of actual totality The core of actual totality or

actual totality proper is centered on the here and now that proves unity in totality The individual groups and lives of all people more or less contribute to the whole depending on productivity that is most beneficial to the whole This is largely dependent on knowledge and its kinds Universal knowledge of the highest kind is the great dynamo of advancing actual totality How well actual totality supplies this need is the most important problem and solution of the next hundreds to thousands of years It is survival over extinction whose success will depend largely on proactive planning prevention preparation management and control They can be used to guide each and all persons to a better unified world by actual totality

**Free Will** Nicholas Rescher, 2017-07-05 This volume is a reassessment of free will and as such seeks to answer the question Do humans ever act under the guidance of the will To determine if humans have free will Rescher first examines what exactly free will is and how it should function While the literature on the subject of free will is vast a good deal still remains to be done to avert obscurity and confusion Rescher leads the reader through a conceptual web of distinctions that taken together provide a satisfying contribution to philosophical thought on free will in general Rescher sharpens his highly conceptual assessment by making distinctions between productive or metaphysical and moral or motivational freedom free decision and free action motivational and causal determination of choices durational events and the instantaneous eventuations that mark their commencements and completions and between pre determination and precedence determination In doing so he also examines the role of nature nurture and free choice Each of these distinctions defines the characteristics of free will and averts a group of problems and difficulties traditionally ascribed to the doctrine With these in place it becomes possible to validate the compatibility between freedom of the will and a certain special mode of determinism Rescher's conceptual perspective in this age old debate opens up the prospect of naturalizing free volition through its natural emergence via the same process of evoking development that has seen the emergence of intelligence on the world's stage That is only after the conceptual issues are settled can the question of how things actually stand be answered This work will be an important reassessment of free will not just because of the author's final conclusion but because of the issue illuminating path he takes to get there

**Anatomy of Spirituality: Portrait of the Soul** Chander Behl, 2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain s biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul
