Moving Beyond Myths Revitalizing Undergraduate Mathematics:

Moving Beyond Myths National Research Council, Mathematical Sciences Education Board, Committee on the Mathematical Sciences in the Year 2000, 1991-02-01 Over the next decade the mathematical community and the nation's colleges and universities must restructure fundamentally the culture content and context of undergraduate mathematics Acknowledging the weaknesses in the present college mathematics curriculum and the ways in which it is taught this book cites exemplary programs that point the way toward achieving the same world wide preeminence for mathematics education that the United States enjoys in mathematical research Moving Beyond Myths sets forth ambitious goals for collegiate mathematics by the year 2000 and provides a sweeping plan of action to accomplish them It calls on mathematics faculty their departments their professional societies colleges and universities and government agencies to do their parts to implement the plan help the public move beyond commonly held myths about mathematics and bring about a revitalization of undergraduate mathematics *Shaping the Future: Perspectives on undergraduate education in science, mathematics, engineering, and technology*, 1996 Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2003-01-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields **Developing a Digital National Library for Undergraduate Science, Mathematics, Engineering and Technology Education** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Steering Committee for Developing a Digital National Library for Undergraduate Science, Mathematics,

Engineering, and Technology Education,1998-01-29 In 1996 the National Science Foundation NSF released a report about ways to improve undergraduate science mathematics engineering and technology SME T education One recommendation called for establishing a digital library similar to those that are being constructed for many research communities that would make available electronically a wide variety of materials for improving teaching and learning of SME T The NSF asked the National Research Council to examine the feasibility of and issues associated with establishing such a digital national library In response an NRC steering committee commissioned a series of papers and convened a workshop to consider these issues This resulting book delineates the issues that should be considered and provides recommendations to resolve them prior to committing funds Teaching in the 21st Century Alice Robertson,Barbara Smith,2002-05-03 The essays in this book argue that the active learning strategies that teachers trained in composition use for their literature courses can be exported to other disciplines to enhance both teacher performance and student learning The book provides and explains examples of those strategies and illustrates how they have been effectively used in other disciplines **Shaping the Future** ,1998

Attracting a New Generation to Math and Science United States. Congress. House. Committee on Science. Subcommittee on Basic Research,2000 African Americans in Mathematics Nathaniel Dean,1997 This volume contains contains research and expository papers by African American mathematicians on issues related to their involvement in the mathematical sciences Little is known taught or written about African American mathematicians Information is lacking on their past and present contributions and on the qualitative nature of their existence in and distribution throughout mathematics This lack of information leads to a number of questions that have to date remained unanswered This volume provides details and pointers to help answer some of these questions **Changing the Culture** Naomi Fisher,Harvey Keynes,1995 This volume is an outgrowth of a series of programs organized by the Mathematicians and Education Reform MER Network between 1990 and 1993 These programs explored the ways in which the mathematical sciences community has responded to educational challenges Mathematicians who had made a serious commitment to educational reform served as role models inspiring others to contribute their efforts to this important work The discussions raised many questions and highlighted many insights about the nature of educational reform and how the mathematics research community can contribute to it The papers in this volume present perspectives on the future of these efforts varied examples of how individual mathematicians have become involved in educational reform and case studies of how the community is responding to the need for reform Viewing the mathematics culture through the prism of his or her own experience and encounters each author contributes a valuable piece for the reader to consider in trying to envision what the large picture will be as mathematics education continues to evolve

California Dreaming Suzanne M. Wilson,2008-10-01 This compelling book tells the history of the past two decades of efforts to reform mathematics education in California That history is a contentious one full of such fervor and heat that participants and observers often refer to the math wars Suzanne M Wilson considers the many perspectives of those involved

in math reform weaving a tapestry of facts philosophies conversations events and personalities into a vivid narrative While her focus is on California the implications of her book extend to struggles over education policy and practice throughout the United States Wilson s three dimensional account of math education reform efforts reveals how the debates tend to be deeply ideological and how people come to feel misunderstood and misrepresented She examines the myths used to explain the failure of reforms the actual reasons for failure and the importance of taking multiple perspectives into account when planning and implementing reform
