Discerning Life with Dreams: The Triadic Relationships Between Dreams, Discernment, and Spiritual Intelligence B. Anne Frey, 2008-01-23 This study explored the relationship between dreams discernment and spiritual intelligence It focused on the experience of people who use dreams to help them with spiritual discernment or decision making in a spiritual context A case study methodology included questionnaires personal dream records and interviews to understand the seven participants experiences of exploring their dreams for guidance Participants were self selected by answering an ad seeking people whose dreams had helped them to make a decision who journaled their dreams and who consider themselves to be spiritual Most participants reported being drawn to dreamwork by a significant life experience While participants shared different perceptions as to what discernment consists of each participant reported that dreams helped them to grow spiritually A number of outcomes were exemplified falling into two main grouping a the use of discernment in order to understand a dream whether or not they ended up reaching a resolution or making a decision about the dream and b the use of dreams as part of a discernment process whether or not the dreams helped them to resolve their discernment issue or make a decision The intensity of emotion attached to an issue seemed for some to render it more difficult to arrive at particular decisions For others dreams seemed to ease the burden of discernment or decision making by raising their degree of confidence towards their resolution or decision Deepening appreciation of and growing desire for living spiritually and learning more about spirituality were indicators of a developing spiritual intelligence For most spiritual growth occurred through knowledge or learning gained from their dreams For some their belief about God s role in their life impacted their experience of the Divine in their dreams Finally the study showed that individuals are not always aware of

what had helped them suggesting a subconscious process at work in both discernment and decision making The study affirmed a triadic link between dreams discernment and spiritual intelligence among people involved in spiritual dreamwork It demonstrated ways by which the discernment process can build confidence in people who are turning to their dreams for guidance in a spiritual context

The Rooted Life Mark Mah, 2019-07-01 To thrive spiritually we need to learn from the trees Each part of the tree its roots trunk branches leaves and seeds gives valuable insights into the Christian life The roots which are critical to the tree's health and invisible to the naked eye refer to the need to develop the inner life of the Christian The root system shared among neighboring trees highlights the importance of communal living among Christians The trunk which is mainly used for wood and has rings in it points to the need for Christians to live sacrificially and to review their lives periodically The branches instruct Christians to draw strength from Christ by abiding in him The leaves call on Christians to be thankful and to seek rejuvenation of their souls when they enter a dry patch in their spiritual lives The seed that falls to the ground and dies challenges Christians to stay put and wait on God in order to gain a foothold in their spiritual lives This book will convince us to look at trees in a different light We begin to appreciate trees which we have taken for granted for their silent wisdom
