Moving Ourselves, Moving Others Ad Foolen,Ulrike M. Lüdtke,Timothy P. Racine,Jordan Zlatev,2012-04-12 The close relationship between motion bodily movement and emotion feelings is not an etymological coincidence While moving ourselves we move others in observing others move we are moved ourselves The fundamentally interpersonal nature of mind and language has recently received due attention but the key role of e motion in this context has remained something of a blind spot The present book rectifies this gap by gathering contributions from leading philosophers psychologists and linguists working in the area Framed by an introducing prologue and a summarizing epilogue written by Colwyn Trevarthen who brought the phenomenological notion of intersubjectivity to a wider audience some 30 years ago the volume elaborates a dynamical active view of emotion along with an affect laden view of motion and explores their significance for consciousness intersubjectivity and language As such it contributes to the emerging interdisciplinary field of mind science transcending hitherto dominant computationalist and cognitivist approaches Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection **A Concordance to the Poems of Robert Browning** Leslie Nathan Broughton,Benjamin Franklin Stelter,1924
