Facilities Change Management Edward Finch, 2011-12-16 Modern organisations are subject to continual change technologies evolve organisational structures are modified people and underlying cultures are transformed Yet the facilities that organisations occupy are static and can impede the changes that are essential to organisational survival The response to change in terms of property and support services is often too little too late leading to facilities that do not support organisational reality The facilities management team is thus constantly challenged to bridge the gap between what an organisation has and what it needs Facilities Change Management is a practical evaluation of the management of change for facilities managers and related professions It considers the forces of change affecting facilities decisions the obstacles to change at a resource level and human level the effective implementation of change the human aspect of change Each of these is considered in relation to modern facilities management issues The discussion will enable practising facilities managers project managers surveyors service providers and architects to understand engage with and manage facilities change effectively at a strategic level Through real life case studies it demonstrates the complexities of change and hidden elements of change that may undermine carefully planned projects

Distinguishing Clinical from Upper Level Management in Social Work Marvin D. Feit, Michael J. Holosko, 2013-03-05. Over the past few decades, as administrative and technological complexity has increased, so has the role and importance of administrative practice in social work. For those making the switch from front-line practice to administration and management, there is therefore a real need to prepare and enhance the knowledge base and skill set necessary at the executive level. In particular, the importance of budgeting and fiscal management, the need for accountability, negotiation between different and competing organizations, along with an understanding of decision making, planning, and understanding levels of risk. Written by two experienced authors within social work education, this practical workbook presents the interrelated nature of decision making and provides a model for understanding what is required in the transition from clinician to clinical and upper level management. The text covers the difference between clinical and upper level management skills, the major trends that influence health and human service organizations, an analysis of the concept of leadership, the skills needed by Clinical Managers and Upper Level Managers to administer effectively. Distinguishing Clinical and Upper Level Management is a much needed update to the field of management and administration within human service organizations and will be important reading for social work students, social service professionals, and other human service providers.

Collision Course Joseph A. McCartin, 2011-10-06. In August 1981, the Professional Air Traffic Controllers Organization (PATCO) called an illegal strike. The new president Ronald Reagan fired the strikers, establishing a reputation for both decisiveness and hostility to organized labor. As Joseph A. McCartin writes, the strike was the culmination of two decades of escalating conflict between controllers and the government that stemmed from the high-pressure nature of the job and the controllers' inability to negotiate with their employer over vital issues. PATCO's fall not only

ushered in a long period of labor decline it also served as a harbinger of the campaign against public sector unions that now roils American politics Now available in paperback Collision Course sets the strike within a vivid panorama of the rise of the world's busiest air traffic control system It begins with an arresting account of the 1960 midair collision over New York that cost 134 lives and exposed the weaknesses of an overburdened system Through the stories of controllers like Mike Rock and Jack Maher who were galvanized into action by that disaster and went on to found PATCO it describes the efforts of those who sought to make the airways safer and fought to win a secure place in the American middle class It climaxes with the story of Reagan and the controllers who surprisingly endorsed the Republican on the promise that he would address their grievances That brief fateful alliance triggered devastating miscalculations that changed America forging patterns that still govern the nation's labor politics Written with an eye for detail and a grasp of the vast consequences of the PATCO conflict for both air travel and America's working class Collision Course is a stunning achievement *Proceedings of the Board of Supervisors, of the County of Schenectady* Schenectady County (N.Y.). Board of Supervisors, 1911 **Management and Administration in Manufacturing Industries**, 1925
