Occult Science Rudolf Steiner, 2013-05-01. Given his energetic involvement in practical initiatives and extensive lecturing, Rudolf Steiner had little time to write books. Of those he did write, belonging almost entirely to the earlier years of his work, four titles form an indispensable introduction to his later teaching: *Knowledge of the Higher Worlds*, *Theosophy*, *The Philosophy of Freedom*, and *Occult Science*. The anthroposophy of Rudolf Steiner is not a theoretical system but the results of research based on direct observation. As Steiner's research was so vast and conducted over such a long period of time, no single book can be said to contain the whole of his spiritual teaching. However, of all his books, *Occult Science* comes closest. Steiner even referred to it as an epitome of anthroposophical spiritual science. The book sets out in systematic order the fundamental facts concerning the nature and constitution of the human being and in chronological order the history of the universe and man. Whereas the findings of natural science are derived from observations made through the senses, the findings of spiritual science or anthroposophy are occult inasmuch as they derive from direct observation of realities which are hidden to everyday perception. And yet these elements of humanity and the universe form the foundation of the sense world. A substantial part of *Occult Science* is occupied by a description of the preliminary training which is necessary to make such spiritual observations. Although *Occult Science* is not all-inclusive, it is indispensable to any serious student seeking to master Rudolf Steiner's extraordinary philosophy. [From Children's](#)

Literacy and Learning in the Content Areas Sharon Kane, 2017-07-05 The 3rd Edition of Literacy Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping, webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content communities and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
