succeeded in getting the popular music they wanted without paying for it Howard S Becker author of Writing for Social Scientists The music industry's ongoing battle against digital piracy is just the latest skirmish in a long conflict over who has the right to distribute music Starting with music publishers' efforts to stamp out bootleg compilations of lyric sheets in 1929 Barry Kernfeld's Pop Song Piracy details nearly a century of disobedient music distribution from song sheets to MP3s In the 1940s and 50s Kernfeld reveals song sheets were succeeded by fake books unofficial volumes of melodies and lyrics for popular songs that were a key tool for musicians Music publishers attempted to wipe out fake books but after their efforts proved unsuccessful they published their own Pop Song Piracy shows that this pattern of disobedience prohibition and assimilation recurred in each conflict over unauthorized music distribution from European pirate radio stations to bootlegged live shows Beneath this pattern Kernfeld argues there exists a complex give and take between distribution methods that merely copy existing songs such as counterfeit CDs and ones that transform songs into new products such as file sharing Ultimately he contends it was the music industry's persistent lagging behind in creating innovative products that led to the very piracy it sought to eliminate Barry Kernfeld's rich and stimulating book makes a significant contribution to current debates over technology copying piracy and the political economy of the music industry Simon Frith University of Edinburgh A welcome addition to the intellectual property rights debate in music Cultural Studies **Ubiquitous Intelligence and Computing**
