Affective Dialogue Systems Elisabeth Andre, Laila Dybkjaer, Wolfgang Minker, Paul Heisterkamp, 2004-06-08 Human conversational partners are able at least to a certain extent to detect the speaker's or listener's emotional state and may attempt to respond to it accordingly When instead one of the interlocutors is a computer a number of questions arise such as the following To what extent are dialogue systems able to simulate such behaviors Can we learn the mechanisms of emotional behaviors from observing and analyzing the behavior of human speakers How can emotions be automatically recognized from a user's mimics gestures and speech What possibilities does a dialogue system have to express emotions itself And very importantly would emotional system behavior be desirable at all Given the state of ongoing research into incorporating emotions in dialogue systems we found it timely to organize a Tutorial and Research Workshop on Affective Dialogue Systems ADS2004 at Kloster Irsee in Germany during June 14-16 2004 After two successful ISCA Tutorial and Research Workshops on Multimodal Dialogue Systems at the same location in 1999 and 2002 we felt that a workshop focusing on the role of affect in dialogue would be a valuable continuation of the workshop series Due to its interdisciplinary nature the workshop attracted submissions from researchers with very different backgrounds and from many different research areas working on for example dialogue processing speech recognition speech synthesis embodied conversational agents computer graphics animation user modelling tutoring systems cognitive systems and human computer interaction

Nonverbal Communication Judith A. Hall, Mark L. Knapp, 2013-01-30 The current volume featuring 28 contributions from cutting edge researchers emphasizes uses purposes origins and consequences of nonverbal communication in the lives of individuals dyads and groups in other words the behaviour of human beings As such the volume as a whole is not just about communication systems per se nor the impact on humans of the physical environment whether built or natural Instead the volume focuses on humans engaging in nonverbal communication and the communicative and psychological aspects of this behaviour Nonverbal behaviour is an inclusive category and includes all emitted nonverbal behaviour that may be subject to interpretation by others whether the behaviour is intentionally produced or not This panoramic volume edited by two of the world's leading authorities on nonverbal communication contains 28 essays presenting the state of the art in the domain of nonverbal behaviour study Reginald B Adams Jr Tamara D Afifi Peter Andersen Sarai Blincoe Ross W Buck Peter Bull Judee K Burgoon Vanessa L Castro Gaetan Cousin Amanda Denes M Robin DiMatteo John P Doody John F Dovidio Marshall Duke Hilary Anger Elfenbein Jos Miguel Fernandez Dols Mark G Frank Jillian Gannon Robert Gifford Laura K Guerrero Sarah D Gunnery Amy G Halberstadt Judith A Hall Jinni A Harrigan Monica J Harris Hyisung C Hwang Jessica

emotion to one side That was acceptable when technology was a small part of life but as technology and life become increasingly interwoven we can no longer ask people to suspend their emotional nature and habits when they interact with technology The European Commission funded a series of related research projects on emotion and computing culminating in the HUMAINE project which brought together leading academic researchers from the many related disciplines This book grew out of that project and its chapters are arranged according to its working areas theories and models signals to signs data and databases emotion in interaction emotion in cognition and action persuasion and communication usability and ethics and good practice The fundamental aim of the book is to offer researchers an overview of the related areas sufficient for them to do credible work on affective or emotion oriented computing The book serves as an academically sound introduction to the range of disciplines involved technical empirical and conceptual and will be of value to researchers in the areas of artificial intelligence psychology cognition and user machine interaction

Audiovisual Speech Processing

Gérard Bailly,Pascal Perrier,Eric Vatikiotis-Bateson,2012-04-26 When we speak we configure the vocal tract which shapes the visible motions of the face and the patterning of the audible speech acoustics Similarly we use these visible and audible behaviors to perceive speech This book showcases a broad range of research investigating how these two types of signals are used in spoken communication how they interact and how they can be used to enhance the realistic synthesis and recognition of audible and visible speech The volume begins by addressing two important questions about human audiovisual performance how auditory and visual signals combine to access the mental lexicon and where in the brain this and related processes take place It then turns to the production and perception of multimodal speech and how structures are coordinated within and across the two modalities Finally the book presents overviews and recent developments in machine based speech recognition and synthesis of AV speech

Ambient Intelligence Giuseppe Riva,2005 The metaphor of Ambient Intelligence AmI tries to picture a vision of the future where all of us will be surrounded by intelligent electronic environments and this ambient has claims to being sensitive and responsive to our needs Ambient Intelligence without invasion of privacy represents a long term vision for the EU Information Society Technologies Research programme A strong multi disciplinary and collaborative approach is a key requirement for large scale technology innovation and the development of effective applications Up to now most of the books and papers related to AmI focus their analysis on the technology potential only An important feature of this volume is the link between the technology through the concepts of ubiquitous computing and intelligent interface and the human experience of interacting in the world through a neuro psychological vision centred on the concept of presence Presence the sense of being there is the experience of projecting one s mind through media to other places people and designed environments The combination of recent discoveries in cognitive neuroscience which make it possible to acquire a better understanding of the human aspects of presence and the breakthroughs at the level of the enabling technologies make it increasingly possible to build novel systems based on this

understanding The goal of this volume is to assess the technologies and processes that are behind the AmI vision in order to help the development of state of the art applications More in detail this volume aims at supporting researchers and scientists interested in the understanding and exploiting the potential of AmI *Data-Driven 3D Facial Animation* Zhigang Deng,Ulrich Neumann,2008 Data Driven 3D Facial Animation systematically describes the important techniques developed over the last ten years or so Comprehensive in scope the book provides an up to date reference source for those working in the facial animation field **Emotion-Oriented Systems** Catherine Pelachaud,2013-02-07 Emotion Oriented Systems The Affective Computing domain term coined by Rosalind Picard in 1997 gathers several scientific areas such as computer science cognitive science psychology design and art The humane machine interaction systems are no longer solely fast and efficient They aim to offer to users affective experiences user s affective state is detected and considered within the interaction the system displays affective state it can reason about their implication to achieve a task or resolve a problem In this book we have chosen to cover various domains of research in emotion oriented systems Our aim is also to highlight the importance to base the computational model on theoretical foundations and on natural data **Multimedia Systems, Standards, and Networks** Atul Puri,2000-03-22 Describes ITU H H 323 and H 324 H 263 ITU T video and MPEG 4 standards systems and coding IP and ATM networks multimedia search and retrieval image retrieval in digital laboratories and the status and direction of MPEG 7 **Human Language Technologies - The Baltic Perspective** A. Tavast,K. Muischnek,M. Koit,2012-09-27 Human language technologies continue to play an important part in the modern information society This book contains papers presented at the fifth international conference Human Language Technologies The Baltic Perspective Baltic HLT 2012 held in Tartu Estonia in October 2012 Baltic HLT provides a special venue for new and ongoing work in computational linguistics and related disciplines both in the Baltic states and in a broader geographical perspective It brings together scientists developers providers and users of HLT and is a forum for the sharing of new ideas and recent advances in human language processing promoting cooperation between the research communities of computer science and linguistics from the Baltic countries and the rest of the world Twenty long papers as well as the posters or demos accepted for presentation at the conference are published here They cover a wide range of topics morphological disambiguation dependency syntax and valency computational semantics named entities dialogue modeling terminology extraction and management machine translation corpus and parallel corpus compiling speech modeling and multimodal communication Some of the papers also give a general overview of the state of the art of human language technology and language resources in the Baltic states This book will be of interest to all those whose work involves the use and application of computational linguistics and related disciplines Virtual Humans Peter M. Plantec,2004 Foreword by Ray Kurzweil author The Age of Spiritual Machines Virtual humans may seem like something out of science fiction but they are already here Companies use them as website hosts individuals use them as personal assistants and people interact with them in computer games

educational applications and many other arenas The possibilities are limitless but the most amazing thing is that anyone can create a V human from scratch Virtual Humans gives not just start to finish instructions for designing a charming synthetic person but also a CD ROM containing the tools and techniques to make it real Readers will learn how to create their own authentic and engaging personalities apply VH technology to business and individual projects add synthetic voices and realistic faces to virtual humans use personality psychology and humor in character design design advanced emotion expression engines This book and CD package is the first of its kind and a landmark on a par with the first build your own Web site products Readers will be among the first to create ultra realistic versatile V human personalities and will start well ahead of what is soon to be a tidal wave of worldwide interest Conversational Informatics Toyoaki Nishida,Atsushi Nakazawa,Yoshimasa Ohmoto,Yasser Mohammad,2014-07-08 This book covers an approach to conversational informatics which encompasses science and technology for understanding and augmenting conversation in the network age A major challenge in engineering is to develop a technology for conveying not just messages but also underlying wisdom Relevant theories and practices in cognitive linguistics and communication science as well as techniques developed in computational linguistics and artificial intelligence are discussed *Proceedings ENTERFACE 2006* Similar,2007 July 17th August 11th Dubrovnik Croatia eNTERFACE 06 the second in the series of eNTERFACE workshops was hosted by the Faculty of Electrical Engineering and Computing University of Zagreb A group of 63 international students from all over the Facets of Virtual Environments Fritz Lehmann-Grube,Jan Sablatnig,2010-02-17 In recent years the popularity of virtual worlds has increased significantly and they have consequently come under closer academic scrutiny Papers about virtual worlds are typically published at conferences or in journals that specialize in something tirely different related to some secondary aspect of the research Thus a paper d cussing legal aspects of virtual worlds may be published in a law journal while a psychologist s analysis of situation awareness may appear at a psychology conference The downside of this is that if you publish a virtual worlds paper at an unrelated conference in this manner you are likely to be one of only a handful of attendees working in the area You will not therefore achieve the most important goal of tending conferences meeting and conversing with like minded colleagues from the academic community of your field of study Virtual worlds touch on many well established themes in other areas of science Researchers from all these fields will therefore be looking at this new interesting and growing field However to do effective research related to these complex constructs researchers need to take into account many of the other facets from other fields that impact virtual worlds Only by being familiar with and paying attention to all these different aspects can virtual worlds be properly understood
