

The background of the slide is a photograph of a desk. On the left, there is a stack of several old, thick books with worn, brownish-gold covers. A black metal bookend is visible on the left side of the stack. In the foreground, slightly to the right, is a rectangular photograph with a white border, showing a dark, textured surface. The overall lighting is soft and warm, suggesting an indoor setting with natural light.

André Maurois and many others. The study combines a comprehensive account of its interest history and range with a discussion of its key concerns, tropes and influence. The argument focuses on science and technology not only as the subject of many of the volumes but also as method especially through the paradigm of the human sciences applied to other disciplines and as a source of metaphors for representing other domains. It also includes chapters on war, technology, cultural studies and literature and the arts. This book aims to reinstate the series as a vital contribution to the writing of modernity and to reappraise modernism's relation to the future, establishing a body of progressive writing which moves beyond the discourses of post-Darwinian degeneration and post-war disenchantment, projecting human futures rather than mythic or classical pasts. It also shows how, as a co-ordinated body of futurological writing, the series is also revealing about the nature and practices of modern futurology itself. *The Open Shelf*, 1929 *The Granta*, 1928 *The Booklist*, 1929 *Booklist*, 1929 Modernism and Close Reading David James, 2020-04-15. The kinship between modernism and close reading has long been taken for granted. But for that reason it has also gone unexamined. As the archives, timeframes and cultural contexts of global modernist studies proliferate, the field's rapport with close reading no longer appears self-evident or guaranteed, even though for countless students studying literary modernism still invariably means studying close reading. This authoritative collection of essays illuminates close reading's conceptual, institutional and pedagogical genealogies as a means of examining its enduring potential. David James brings together a cast of world-renowned scholars to offer an account of some of the things we might otherwise know and need to know about the history of modernist theories of reading, before then providing a sense of how the futures for critical reading look different in light of the multiple ways in which modernism has been close-read. *Modernism and Close Reading* responds to a contemporary climate of unprecedented reconstitution for the field; it takes stock of close reading's methodological possibilities in the wake of modernist studies' geographical, literary, historical and interdisciplinary expansions, and it shows how the political, ethical and aesthetic consequences of attending to matters of form complicate ideological preconceptions about the practice of formalism itself. By reassessing the intellectual commitments and institutional conditions that have shaped modernism in criticism as well as in the classroom, we are able to ask new questions about close reading that resonate across literary and cultural studies. Invigorating that critical venture, this volume enriches our vocabulary for addressing close reading's perpetual development and diversification. *Federal Register*, 1996-08 Contemporary Literary Critics NA, 2015-12-25.
