Mscience 2 Ib Exploring The Env:

Exploring Entrepreneurship Richard Blundel, Nigel Lockett, 2011-01-13 The text explores the nature of entrepreneurial activity in the 21st century and aims to develop the skills required by aspiring entrepreneurs Readers will gain a deeper insight into the activities of entrepreneurs and reflect critically on the nature of entrepreneurship and its role in the creation of new ventures

A Cold Colonialism Tina Adcock, 2025-06-01 Exploration has long been pivotal to southern engagements with northern Canada but it is most often associated with the nineteenth century or earlier A Cold Colonialism offers the first extended examination of twentieth century exploration in the Canadian North Modern exploration helped southerners establish and maintain distinctive kinds of colonial and settler colonial power over northern Indigenous homelands Who explored the North between 1918 and 1965 What forms did exploration take What did it mean to explorers and others affected by it Tina Adcock focuses on four representative explorers with richly documented careers mining engineer George Douglas surveyor Guy Blanchet ethnologist Vilhjalmur Stefansson and filmmaker Richard Finnie Despite limited experience in and knowledge of the Canadian North these explorers helped southern militaries industries and governments exert control over northern peoples and their lands Each also claimed belonging in and authority over the North in ways that still resonate among southern settlers in Canada today

Exploration and Monitoring of the Continental Shelf Underwater Environment Iftikhar B. Abbasov, 2018-09-14 Dedicated to the unique developments of hydroacoustical equipment to monitor the sea coastal shelf environment this groundbreaking unique study presents a survey of modern methods and technical monitoring facilities including the diagnostics of underwater engineering when monitoring offshore There is still so much about the oceans that scientists do not know and exploring the continental shelves of the world is a huge part of finding out more about these underwater environments Further to that it is extremely important that while scientists and engineers explore and monitor the continental shelf no damage is done to these precious environments That is the needle that this study intends to thread giving scientists and engineers a better method and processes for exploring these underwater mysteries while protecting the environment and wildlife thriving beneath Written by a proven scientist in this area this book is dedicated to the unique developments of hydroacoustical equipment to monitor the coastal shelf The results of the original experimental sonar studies with application of the parametric antenna are presented The book presents a survey of the modern methods and technical monitoring facilities of the coastal aqueous environment The basic characteristics of the parametric antennas are given considering propagation of the acoustic waves in the environments with dispersion and acoustical absorption The author and his colleagues consider the questions of formation of the parametric antenna field in layered heterogeneous media and the peculiarities of sounding of the interfaces and bottom sediments Ecological monitoring methods of the basic parameters of quality and condition of the aqueous environment are analyzed The peculiarities of diagnostics of the underwater engineering constructions when monitoring the offshore strips are described

For both veteran engineers and students in the field alike this breakthrough study is a must have for any scientific library concerned with studying the oceans and especially the continental shelf

Digital (Eco) Systems and Societal Challenges Alessio Maria Braccini, Francesca Ricciardi, Francesco Virili, 2024-12-13 This book presents a collection of research papers that aim to elucidate the pivotal role of digital systems in driving the formation and evolution of digital ecosystems thereby shaping new scenarios for organizing in the digital age by considering people practices organizational processes and system design issues Each chapter offers insights into the ways in which digital systems and digital ecosystems contribute to addressing societal challenges promoting sustainable development enhancing collaboration and mitigating the negative effects of technological disruption Using a multidisciplinary perspective and multimethodological approaches it explores the impact of digital eco systems on governance structures economic models and social dynamics and provides insights into the transformative potential of digitalization in shaping the future of societies worldwide The diversity of perspectives makes this book particularly relevant for academics businesses and public sector organizations The content of the book is based on the revised versions of a selection of the best papers presented at the annual conference of the Italian Section of the AIS in October 2023 in Turin Italy

Heavy Metal Contamination in the Environment Veer Singh, Ashish Kumar, Vishal Mishra, Sachchida Nand Rai, 2024-12-30 This reference book explores the multifaceted problem of heavy metal contamination in the environment Through its in depth analysis the book provides a thorough overview of the sources and pathways of heavy metals their persistence in ecosystems and the resulting health impacts on individuals and ecosystems The chapters explore the diverse sources of contamination including industrial activities mining agriculture and urbanization while examining the types of heavy metals found in the environment and their toxicological properties The book further reviews the profound health effects associated with heavy metal exposure such as neurological disorders developmental abnormalities carcinogenicity and organ damage Furthermore the book provides insights into risk assessment methodologies regulatory frameworks and guidelines aimed at controlling and minimizing heavy metal exposure It highlights the challenges and gaps in current regulations identifies potential areas for improvement and presents analytical techniques for heavy metal analysis and removal This book is an important source for researchers and professionals working in the fields of environmental science toxicology and public health

Environmental Policy Science's Exploration for Innovative Data Nicholas Guehlstorf, 2025-08-04 This edited volume discusses the use of nontraditional data sources in environmental political research and its implications for policymaking Researchers involved in natural resource investigations and pollution control analysis must be entrepreneurial in finding and utilizing data sets to answer pressing policy questions To remain relevant successful researchers must increasingly seek data beyond routine federal program assessments fragmented local surveys and limited stakeholder interactions This volume surveys current environmental research that draws on emerging data sources such as social media and political discourse It poses critical questions about the potential of creative and

innovative analytical approaches particularly in contexts where policymakers have disregarded objective evidence based social science on environmental challenges By encouraging scholars to adopt new methods research designs and data sources this book offers valuable insights for researchers across the social and environmental sciences **Microbial Bioremediation and Multiomics Technologies for Sustainable Development** Fuad Ameen, Sartaj Ahmad Bhat, Vineet Kumar, 2024-08-02 The steadily increasing presence of both natural and anthropogenic pollutants in our environment poses a considerable challenge given the recalcitrance of many of these pollutants Microbial bioremediation presents a promising and sustainable strategy that harnesses a diverse array of microorganisms operating either concurrently or sequentially to eliminate or mitigate the presence of pollutants within the environment Recent years have witnessed the application of multiomics techniques to the study of biodegradation and bioremediation yielding an abundance of novel data that enrich our comprehension of pivotal pathways and offer fresh perspectives on the adaptability of organisms amidst shifting environmental conditions This book brings together recent progress in microbial bioremediation emphasizing the emerging field of multiomics technologies It serves as a valuable reference for microbiologists exploring multiomics applications and environmental scientists seeking innovative remediation solutions **Exploring the Unknown** John M. Logsdon, 1995

Advances in Geology and Resources Exploration Ahmad Safuan Bin A Rashid, Shiqi Huang, 2022-09-19 Advances in Geology and Resources Exploration provides a collection of papers resulting from the conference on Geology and Resources Exploration ICGRED 2022 Harbin China 21-23 January 2022 The primary goal of the conference is to promote research and developmental activities in geology resources exploration and development and another goal is to promote scientific information interchange between scholars from the top universities business associations research centers and high tech enterprises working all around the world The conference conducted in depth exchanges and discussions on relevant topics such as geology resources exploration aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of engineering geology geological resources and geothermal energy By sharing the status of scientific research achievements and cutting edge technologies this helps scholars and engineers all over the world to comprehend the academic development trend and to broaden research ideas With a view to strengthen international academic research academic topics exchange and discussion and promoting the industrialization cooperation of academic achievements Sustainable and Resilient Infrastructure Development in Africa's Changing Climate Emmanuel Adinyira, Clifford Amoako, Titus Ebenezer Kwofie, Clinton Aigbavboa, Kofi Agyekum, Michael Addy, 2024-10-11 This book contains the proceedings of ICIDA 2023 The conference is a platform for deliberating the delivery and management of infrastructure in Africa in the face of a changing climate It helped to engage various stakeholders in the continent and beyond on how to develop and deliver sustainable and resilient infrastructure against climate variabilities This book brings together the experiences of participants gathered through many years of research and practice across various

fields of infrastructure development that can help shape the future of the African continent **The International Business Environment** Leslie Hamilton, Philip Webster, 2018 The most multi perspective succinct and applied guide to international business environments On the Backs of Others Edward Armston-Sheret, 2024 In the Victorian and Edwardian eras British explorers sought to become respected geographers and popular public figures downplaying or reframing their reliance on others for survival Far from being solitary heroes these explorers were in reality dependent on the bodies senses curiosity and labor of subaltern people and animals In On the Backs of Others Edward Armston Sheret offers new perspectives on British exploration in this era by focusing on the contributions of the people and animals ordinarily written out of the mainstream histories who made these journeys possible He explores several well known case studies of enduring popular and academic interest such as Richard Francis Burton and John Hanning Speke s Nile expeditions 1856 59 and 1860 63 Isabella Bird s travels in North America Persia and East Asia 1872 c 1900 and Captain Robert Falcon Scott s two Antarctic expeditions 1901 4 and 1911 13 Armston Sheret argues that numerous previously ignored stories show the work and agency of subaltern groups In rethinking the history of exploration On the Backs of Others offers the first book length study of the relationship between exploration and empire and their legacies within academic geography *Examining the Cognitive and Psychological Effects of the COVID-19 Global Pandemic on High School, College, and Graduate Learners* Jill D. Salisbury-Glennon, Chih-hsuan Wang, David M. Shannon, 2025-09-24 To date there remains limited knowledge about the cognitive motivational and psychological impact of the COVID 19 global pandemic on learners across all developmental levels This book seeks to explore the impact of the COVID 19 global pandemic on high school undergraduate and graduate level learners around the world **Handbook of Intellectual Styles** Li-fang Zhang, Robert J. Sternberg, Stephen Rayner, PhD, 2012 Because of the thoroughness of the literature reviews and the comprehensive coverage of the chapter topics this book should be required reading for any scholar working in related areas of personality or intelligence **PsycCRITIQUES** This book is a masterly attempt to bring order and cohesion to a field that for many years has been riven with claims and counterclaims The editors and authors are to be congratulated for addressing a very complex task so helpfully John Biggs PhD Honorary Professor of Psychology University of Hong Kong If you are interested in intellectual styles people s preferred ways of processing information then this book belongs on your bookshelf Richard E Mayer PhD Professor of Psychology University of California Santa Barbara For more than half a century the construct of style whether designated as cognitive thinking or learning has been in or out of fashion in the history of psychology and education The editors of the present Handbook have invigorated the style construct in the form of intellectual styles and have brought together a distinguished international panel of chapter authors who offer up to date surveys of the assessment development correlates and educational and organizational applications of intellectual styles For those seeking to familiarize themselves with current theory and research in an intellectually exciting field the present Handbook is essential Nathan Kogan PhD Professor

Emeritus Department of Psychology New School for Social Research New York NY The concept of intellectual styles has had a controversial history based on diverse philosophical and theoretical foundations Most recently the idea of intellectual styles an umbrella term that covers such closely related constructs as cognitive styles learning styles teaching styles and thinking styles has gained momentum as an explanation for why different people succeed in different professional and organizational settings Previously it was thought that high achievers simply had more innate abilities than their less successful peers but research has shown that individuals have different intellectual styles that are better suited for varying types of contexts and problems Based on the most current and expansive research this handbook is the first to provide a comprehensive review of research on the construct of intellectual style from its foundations and development to its relations to allied constructs its roles in school and job performance its applications in various populations and its future This understanding of intellectual styles as a valid concept for both individuals and groups has far reaching implications for researchers in cross cultural psychology multicultural education organizational behavior and work performance and many other academic disciplines as well as practitioners in education and beyond

Key Features Provides a comprehensive review of intellectual styles from multiple perspectives Written for students and scholars in diverse academic arenas as well as practitioners in education and other fields Includes contributions from researchers from diverse disciplines such as psychology business education and health sciences

International Arctic Petroleum Cooperation Anatoli Bourmistrov, Frode Mellemvik, Alexei Bambulyak, Ove Gudmestad, Indra Overland, Anatoly Zolotukhin, 2015-06-05 The Arctic region contains large amounts of natural resources considered necessary to sustain global economic growth so it is unsurprising that it is increasingly susceptible to political economic environmental and even military conflicts This book looks in detail at the preconditions and outlook for international cooperation on the development of Arctic petroleum resources focusing on Norwegian Russian cooperation in the Barents Sea towards 2025 The authors provide a cross disciplinary approach including geopolitical institutional technological corporate and environmental perspectives to analyse the underlying factors that shape the future development of the region Three future scenarios are developed exploring various levels of cooperation and development influenced by and resulting from potential political commercial and environmental circumstances Through these scenarios the book improves understanding of the challenges and opportunities for Arctic petroleum resource development and promotes further consideration of the possible outcomes of future cooperation The book should be of interest to students scholars and policy makers working in the areas of Arctic studies oil and gas studies energy security global environmental governance environmental politics and environmental technology Chapters 1 2 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Biopolymers in Sustainable Corrosion Inhibition Saman Zehra, Mohammad Mobin, Chandrabhan Verma, 2024-02-26 Biopolymers in Sustainable Corrosion Inhibition covers the fundamentals properties

and applications of biopolymers and considers their superiorities over traditional alternatives It explores the synthesis characterization inhibition mechanism and applications of biopolymeric anticorrosive materials Focusing on environmentally friendly corrosion prevention methods this book demonstrates how biopolymers slow the corrosion rate and avoid economic losses owing to the metallic corrosion on industrial liners tools or surfaces This book covers the sustainable corrosion inhibition potential of biopolymers and their derivatives including chitosan cellulose chitin starch and natural gums This book will be a valuable reference for undergraduate and graduate students and academic researchers in the fields of biopolymers corrosion science and engineering environmental science chemical engineering green chemistry and mechanical industrial engineering

Arsenic Kevin Henke, 2009-02-25 This book presents an overview of the chemistry geology toxicology and environmental impacts of arsenic presenting information on relatively common arsenic minerals and their key properties In addition it includes discussions on the environmental impacts of the release of arsenic from mining and coal combustion Although the environmental regulations of different nations vary and change over time prominent International North American and European guidelines and regulations on arsenic will be reviewed Includes information on recent environmental catastrophes e g Bangladesh and China A thorough discussion of the arsenic cycle including the cosmological origin of arsenic Includes Appendices providing extensive glossary and measurement conversion tables

Smart Universities in Smart Cities Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-06-30 Smart Universities in Smart Cities Shaping the Future of Education and Urban Innovation focuses on how higher education institutions are adapting to the challenges of the digital age in a world increasingly influenced by technology and sustainability Universities are becoming an indispensable element of smart cities driving forward innovation sustainability and urban living The book explores how emerging technologies such as AI IoT and blockchain are transforming campuses into dynamic data driven ecosystems Both of these dimensions are studied through data analytics case studies and futuristic thinking perspectives to identify opportunities and challenges of the establishment of smart universities within the broader ecosystem of smarter cities The book offers a holistic approach to planning educational institutions covering issues such as sustainable campus development digital learning environments and smart mobility solutions As universities undergo digital transformation they advance not only learning but also the larger role of academia in society The book envisions the future where intelligent campuses act as centres of knowledge collaboration and sustainable development propelling the world into a smarter and more inclusive reality for future generations It will be of interest to researchers and students of urban planning and sustainability studies as well as to urban planners and policymakers

Game Changer-Next Generation Sequencing and Its Impact on Food Microbiology Jennifer Ronholm, Sabah Bidawid, Sandra Torriani, 2018-04-26 Advances in next generation sequencing technologies NGS are revolutionizing the field of food microbiology Microbial whole genome sequencing WGS can provide identification characterization and subtyping of pathogens for epidemiological investigations at a level of precision previously not possible

This allows for connections and source attribution to be inferred between related isolates that may be overlooked by traditional techniques. The archiving and global sharing of genome sequences allow for retrospective analysis of virulence genes, antimicrobial resistance markers, mobile genetic elements and other novel genes. The advent of high throughput 16S rRNA amplicon sequencing in combination with the advantages offered by massively parallel second generation sequencing for metagenomics enable intensive studies on the microbiomes of food products and the impact of foods on the human microbiome. These studies may one day lead to the development of reliable culture independent methods for food monitoring and surveillance. Similarly RNA seq has provided insights into the transcriptomes and hence the behaviour of bacterial pathogens in food, food processing environments and in interaction with the host at a resolution previously not achieved through the use of microarrays and or RT PCR. The vast untapped potential applications of NGS along with its rapidly declining costs give this technology the ability to contribute significantly to consumer protection, global trade facilitation and increased food safety and security. Despite the rapid advances challenges remain. How will NGS data be incorporated into our existing global food safety infrastructure? How will massive NGS data be stored and shared globally? What bioinformatics solutions will be used to analyse and optimise these large data sets? This Research Topic discusses recent advances in the field of food microbiology made possible through the use of NGS.

Mineral Resources, Economics and the Environment

Stephen E. Kesler, Adam C. Simon, 2015-10-26

Written for students and professionals this revised textbook surveys the mineral industry from geological, environmental and economic perspectives. Thoroughly updated the text includes a new chapter on technology, industry metals as well as separate chapters on mineral economics and environmental geochemistry. Carefully designed figures simplify difficult concepts and show the location of important deposits and trade patterns, emphasising the true global nature of mineral resources. Featuring boxes highlighting special interest topics the text equips students with the skills they need to contribute to the energy and mineral questions currently facing society including issues regarding oil pipelines, nuclear power plants, water availability and new mining locations. Technical terms are highlighted when first used and references are included to allow students to delve more deeply into areas of interest. Multiple choice and short answer questions are provided for instructors online at www.cambridge.org/kesler to complete the teaching package.
