Monthly Bulletin International Railway Congress Association, 1921 [The History of Urban Planning in Spain, Portugal and Morocco](#) Carmen Hass-Klau, 2025-09-08 This book includes a historic overview of urban planning in the Iberian Peninsula and Morocco from 700 AD until the 20th century Under Muslim rule there was an urban sophistication which was unfamiliar in the Christian world The conquest of Granada and the discovery of America was seen as the beginning of a new era but this book presents a different view of Spain and Portugal which does not equate with the glamorous picture usually painted Chapters detail the untold story of Muslim refugees who founded towns in Morocco and how the conflicts between Morocco and Spain started not only politically but also in terms of town planning when Spain took over the Moroccan north The history of Islamic city planning shows more consistency compared to the Christian equivalent which became dominant worldwide whereas the Islamic approach is mainly forgotten Despite this the change from Islamic to Christian cities was extremely slow regardless of the power of the church and the wealth which came from abroad In tracing this history this book seeks to highlight the past in order to learn from it and move towards building a future of livable cities This book will be of interest to students and instructors of planning history urban planning and human geography and to people who are generally interested in history and cities *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1979 *Morbidity and Mortality Weekly Report*, 2008 *'Ending AIDS' in the Age of Biopharmaceuticals* Tony Sandset, 2020-09-02 This book considers the change in rhetoric surrounding the treatment of AIDS from one of crisis to that of ending AIDS Exploring what it means to end AIDS and how responsibility is framed in this new discourse the author considers the tensions generated between the individual and the state in terms of notions such as risk responsibility and prevention Based on analyses public health promotions in the UK and the US HIV prevention science and engaging with the work of Foucault this volume argues that the discourse of ending AIDS implies a tension filled space in which global principles and values may clash with localised needs values and concerns in which evidence based policies strive for hegemony over local tacit and communal regimes of knowledge and in which desires compete with national and international ideas about what is best for the individual in the name of ending AIDS writ large As such it will appeal to scholars of sociology and media studies with interests in the sociology of medicine and health medical communication and health policy
