Summaries of Technical Reports, 1982 Volcanic Ash Shona Mackie, Katharine Cashman, Hugo Ricketts, Alison Rust, Matt Watson, 2016-05-24 Volcanic Ash Hazard Observation presents an introduction followed by four sections each on a separate topic and each containing chapters from an internationally renowned pool of authors The introduction provides a volcanological context for ash generation that sets the stage for the development and interpretation of techniques presented in subsequent sections The book begins with an examination of the methods to characterize ash deposits on the ground as ash deposits on the ground have generally experienced some atmospheric transport This section will also cover basic

information on ash morphology density and refractive index all parameters required to understand and analyze assumptions made for both in situ measurements and remote sensing ash inversion techniques Sections two three and four focus on methods for observing volcanic ash in the atmosphere using ground based airborne and spaceborne instruments respectively Throughout the book the editors showcase not only the interdisciplinary nature of the volcanic ash problem but also the challenges and rewards of interdisciplinary endeavors Additionally by bringing together a broad perspective on volcanic ash studies the book not only ties together ground air academic and applied approaches to the volcanic ash problem but also engages with other scientific communities interested in particulate transport Includes recent case studies highlighting the impact of volcanic ash making methods used for observation more accessible to the reader Contains advances in volcanic ash observation that can be used in other remote sensing applications Presents a cross disciplinary approach that includes not only methods of tracking and measuring ash in the atmosphere but also of the fundamental science that supports methodological application and interpretation Edited by an internationally recognized team with a range of expertise within the field of volcanic ash *Chemical Events in the Atmosphere and their Impact on the Environment* G.B.
