The **Universe** includes all the matter and energy that space contains. The universe is believed to be at least 10 billion light years in diameter and contains a vast number of galaxies; it has been expanding since its creation in the Big Bang about 13 billion years ago.

The **Universe** is composed almost completely of dark energy, dark matter, and ordinary matter.

The **Universe** is also called *the cosmos*. It is originally a greek word. In early days it was thought that our Galaxy constituted the entire universe.
