Countries Carlos Oya, Nicola Pontara, 2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context

Heba F. El-Shazli, 2019-05-24 We started the 2011 revolution and the rest of Egypt followed say Egyptian workers with strong conviction and passion Egyptian independent workers continuous claims of contention and protest repertoires were one of several main factors leading to the January 25 2011 uprising After thirty two years of a Mubarak led authoritarian regime massive protests began in January 2011 and forced President Mubarak to step down from his position on February 11 2011 So how did Egyptian workers challenge the regime and how did they become one of the factors leading to the January 2011 uprising These workers were organized into loose networks of different independent groups that had been protesting

for a decade and longer prior to January 2011 These regular protests for over a decade before 2011 challenged the Egyptian authoritarian regime This book examines the combative role of Egyptian independent workers formal and informal organizations as a contentious social movement to challenge the regime It will examine the evolving role of workers as socio economic actors and then as political actors in very political transitions Social movement theory SMT and its mechanisms and social movement unionism SMU will be the lenses through which this research will be presented The methodology used will be the comparative case studies of two different movements where workers who advocated for their rights for a decade prior to January 2011 experienced significantly differing outcomes One case study showcases the municipal real estate tax collection workers who were able to establish a successful social movement and then create an independent trade union The second case study examines an influential group of garment and textile workers who also developed an effective social movement yet they were not able to take it to the next step to establish an independent union I will explore within this research a second question why one group of workers was able to establish an independent union while the other arguably more influential group of workers the garment and textile workers was not able to do so This had an impact on the overall influence they were able to exercise over the regime in addition to their effectiveness as a social movement for change
