Economy International Trade Globalization The Post-1945 Internationalization of Economics Alfred William Coats, 1997 In addressing the internationalization of economics after 1945 these essays are concerned with aspects of economic education the economist's role in policymaking and the sociology and professionalization of the discipline These matters have rarely been considered in international terms While discussing organizations such as the World Bank International Monetary Fund and the European Community and presenting studies that are primarily concerned with the effect of these developments in particular countries this volume focuses on the situation of Latin America Arguably the post 1945 internationalization of economics has proceeded further more dramatically and with greater effect in that continent than in any other region of comparable size Contributors S Ambirajan William Ascher William J Barber Young Back Choi A W Coats Barend de Vries Margaret Garrison de Vries Peter Groenewegen Arnold Harberger Aiko Ikeo Maria Rita Loureiro Ivo Maes Veronica Montecinos Jacques J Polak Pier Luigi Porta Bo Sandelin Ann Veiderpass John Williamson **Global Political Economy**, 2009 This book is the eagerly awaited successor to Robert Gilpin's 1987 *The Political Economy of International Relations* the classic statement of the field of international political economy that continues to command the attention of students researchers and policymakers The world economy and political system have changed dramatically since the 1987 book was published The end of the Cold War has unleashed new economic and political forces and new regionalisms have emerged Computing power is increasingly an impetus to the world economy and technological developments have changed and are changing almost every aspect of contemporary economic affairs Gilpin's *Global Political Economy* considers each of these developments Reflecting a lifetime of scholarship it offers a masterful survey of the approaches that have been used to understand international economic relations and the problems faced in the new economy Gilpin focuses on the powerful economic political and technological forces that have transformed the world He gives particular attention to economic globalization its real and alleged implications for economic affairs and the degree to which its nature extent and significance have been exaggerated and misunderstood Moreover he demonstrates that national policies and domestic economies remain the most critical determinants of economic affairs The book also stresses the importance of economic regionalism multinational corporations and financial upheavals Gilpin integrates economic and political analysis in his discussion of global political economy He employs the conventional theory of international trade insights from the theory of industrial organization and endogenous growth theory In addition ideas from political science history and other disciplines are employed to enrich understanding of the new international economic order This wide ranging book is destined to become a landmark in the field The Political Economy of International Relations Robert Gilpin, 1987 *The Political Economy of International Co-operation* Paolo Guerrieri, Paolo Guerrieri, Pier Carlo Padoan, 1988 Examines the problems of international co operation which have become central in international political economy **The Political Economy of Globalization** Satya Dev Gupta, 2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues

widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development
