Nagel, 2018-02-06 This title was first published in 2000 An analysis of India's development and public policy from the perspectives of five major fields of public policy 1 Economic policy including public policy toward industrial development 2 Social policy including religion education and women's rights 3 Environmental policy including possible conflict with economic development 4 Science technology policy including agricultural development information technology and administering the electronics industry 5 Political reform including local government and general elections **Asian Development and Public Policy** Stuart S. theorists and in contemporary research that has either developed or challenged these ideas The book argues that while socialization has sometimes been framed as an outdated static approach it in fact remains highly relevant and continues to provide valuable insight into how we come to act and think as we do Drawing on a wide variety of empirical examples the book offers a lively accessible account of primary and secondary socialization and how they interconnect By considering socialization as a process that continues throughout the life course the book highlights the dynamic and enduring ways in which the social world is involved in shaping and reshaping individuals shedding productive light on the effects of class gender and race as well as on inequality and domination Socialization will appeal to students and scholars in sociology as well as other disciplines such as psychology and education

Inquiry and Change Charles E. Lindblom, 1990-01-01 Winner of the American Political Science Association's 1991 Woodrow Wilson Foundation Book Award for the best book published in the United States during 1990 on government politics or international affairs How do ordinary citizens government officials opinion leaders or social scientists attempt to solve social problems How competent are we at defining the problems seeking information and finding answers In this important and controversial book a distinguished social scientist meticulously analyzes our attempt to understand society so that we can reshape it In so doing he largely bypasses both epistemology and contemporary highly abstract theory on knowledge and society in order to achieve a far more concrete analysis of discourse and inquiry in social problem solving There is a tragic discrepancy argues Charles E Lindblom between our abilities to solve problems and the difficulty of the problems to be solved We must make do with inadequate information and inconclusive analyses for the task is less one of learning the truth than of proceeding in inquiry and decisions when the truth cannot be known Lindblom discusses the many obstacles that prevent us from solving social problems focusing in particular on learned incompetence According to Lindblom parents teach children not to think certain thoughts and schools often engage more in indoctrination than education Political rhetoric and commercial sales promotion feed a steady diet of misrepresentation Social science does help But because it is dependent on popular thought it shares the impairments of thought found in both political figures and ordinary citizens It also develops its own distinctive impairments and is to a degree crippled by its narrow view of scientific method often more interested in proving than probing Although social science can be improved in ways that Lindblom outlines in his book social inquiry calls for such significant contributions from lay thought that it renders many conventional ideals of scientific problem solving inappropriate Lindblom contends that the route to better social problem solving is not through either scientific or popular consensus or agreement however much they are valued in the world of science and social science but through a competition of ideas The index of a society's competence he states is in its discord over ends values or purposes As usual Lindblom cuts through to the core of the issue How is society to understand its central problems and challenges With originality and courage he takes on the social scientists and the policy analysts and presents an inspiring picture of a self guiding democracy that continuously deliberates over means and ends A signal

contribution Robert B Reich Harvard University The Politics of the Developing Areas Gabriel Abraham Almond, James Smoot Coleman, 2015-03-08 A pioneering venture this book is the first major effort toward a valid comparison of the political systems of Asia Africa the Near East and Latin America After establishing a theoretical framework based on a functional approach to comparative politics the authors apply their scheme to Southeast Asia Lucian W Pye South Asia Myron Weiner SubSaharan Africa James S Coleman the Near East Dankwart Rustow and Latin America George I Blanksten In each area they survey the political background the nature and function of political governmental and authoritative structures the processes of change and means of political integration The contributors have performed an extraordinarily difficult feat of classification description synthesis and analysis in what promises to be a book of seminal importance in comparative politics Originally published in 1960 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Beyond Dutch Borders Liza Mügge, 2010 Despite widespread scepticism in receiving societies migrants often remain loyal to their former homeland and stay active in the politics there Beyond Dutch borders is about such ties Combining extensive fieldwork with quantitative data this book compares how transnational political involvement among guest workers from Turkey and post colonial migrants from Surinam living in the Netherlands has evolved over the past half century It looks at Turks seeking to improve their position in Dutch society Kurds lobbying for equal rights in Turkey and Surinamese hoping to boost development in their country of origin Sending state governments political parties and organisations are shown to be key shapers of transnational migrant politics both in opposition to and support of homeland ruling elites Meanwhile it becomes clear that migrants border crossing loyalties and engagement have not dented their political integration in the receiving societies quite the opposite Certainly in this respect the sceptics have been wrong **Making the World Global** Isaac A. Kamola, 2019-06-07 Following World War II the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation states As neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold By the 1990s American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education In Making the World Global Isaac A Kamola examines how the relationships among universities the American state philanthropic organizations and international financial institutions created the conditions that

made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced

Education for Democratic Citizenship Roberta S. Sigel, Marilyn B. Hoskin, 2013-01-11 It is becoming increasingly clear that members of a host nation as well as newcomers have to learn what it means to live democratically in a multi ethnic world and to accept diversity without fear or rancor This volume a result of a conference sponsored by the Spencer Foundation asks a question of increasing significance in view of post World War II immigration

patterns and the spread of democratic forms of government What can educational researchers and practitioners do to prepare our youth for cooperative constructive living in a democracy This book illustrates how six post industrial nations Canada Germany Israel The Netherlands the United Kingdom and the United States have met or failed to meet this challenge

Lebanon in Strife Halim Barakat, 2014-06-23 In this study an eminent sociologist of the Arab world analyzes student politics in Lebanon and their relationship to the civil war This focus is part of a larger concern with upheaval in Arab society and with political and social integration in mosaic societies in general Professor Barakat provides a clear thorough and comprehensive analysis of late twentieth century Lebanese society and the dominant ideological veins within it Lebanon in Strife is a comparative study of Lebanese youth with special emphasis on their alienation from society and politics and their place at the vanguard of social change The study is set in the context of the continual confrontation between forces for change and the established order in Lebanon viewed from both a local and an international perspective The author argues that vertical loyalties based on religious ethnic or regional ties are more significant than horizontal loyalties based on socioeconomic class in determining Lebanese student political behavior and attitudes However vertical loyalties are explained in socioeconomic terms for the two forms of cleavages coincide and the whole society is composed of religious communities arranged in a hierarchy of power and status The author shows that these ties conflict with and undermine orderly social change and national unity and that they could account for conditions that have led to civil war in Lebanon In an epilogue Professor Barakat relates his analysis of student politics to political developments in Lebanon during the civil war of 1975 1976 including an assessment of the role of Syria and the prospects for a negotiated end to armed struggle in the country This is the first empirical study of Lebanese political life viewed from the standpoint of its central force for change the students It is an invaluable resource for students of the modern Middle East as well as for specialists in sociology politics and history Lebanon in Strife has special relevance to problems of political change and development in the Third World countries providing a sociopolitical model for the analysis of student politics in traditional and transitional societies

National Security, Democracy, & Good Governance in Post-Military Rule Nigeria, Volume One Dr. Dan Mou, 2016-12-30 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the seventy one percent 71% of Nigerias population still living below poverty line This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness the worst civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to

move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use

International Relations Theory Michael Haas, 2016-12-27 While many texts on international relations deal only with ideologies this book goes beyond discussion of ideology to provide an understanding of how global economics politics and society operate The book begins with a history of the International Studies Association which was founded to develop empirically based knowledge and was opposed to ideological isms as biased guides to policy The book focuses on four major paradigms Marxian Mass Society Community Building and Rational Choice with diagrams indicating their empirical predictions over time The Marxian paradigm focuses on scientific claims of Marx and Engels The Mass Society paradigm explains why democracies become dysfunctional The Community Building paradigm explains how communities can be and are built at the local national regional and international levels The Rational Choice paradigm assembles proposed explanations of reason based economic political and social life to demonstrate what they have in common Other candidates for paradigms are reviewed with a focus on why they need further development to become major paradigms at the decision making dyadic societal national and international system levels of analysis

Making of an African Giant Dan Mou, 2015-10-16 The performance of Nigeria has recently been vehemently criticized as not commensurate with her human and material potentialities The hope that Nigeria is by destiny the African Giant appears to be fading Some analysts seeing this have blamed it on the character defects of the leadership in Nigeria They argue that because the leaders are predatory and corrupt they have preoccupied themselves with their interests which are primitive accumulation and luxurious lifestyles Meanwhile the rest of the citizens are suffering This book argues that such character defects may indeed exist in some of Nigerian leaders However these are not the main reasons for their dismal performance regarding the welfare of the citizens The main problem is that Nigerian leaders seem to have largely lost control over the state and its policies which appear to have been captured by the dominant classes and groups local and international Nigerias main problem is therefore a structural one Nonetheless the book concludes as the security economic political and social crises intensify Nigerian leaders even if it is simply for self preservation will be forced by the objective conditions to move against the interests of these dominant classes and groups It is only then that Nigeria can realistically be restored to the possibility of becoming an African Giant

The Mass Psychology of Ethnonationalism Dusan Kecmanovic, 2013-11-11 Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent The latest events in the Balkans in central and eastern Europe and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns first and foremost the rights and interests of people of other ethnicities What is the social psychological and anthropological underpinning of ethnonationalism And finally why and how do people adhere to nation alist attitudes and beliefs These questions are virtually

impossible to avoid for anyone who has directly felt the impact of ethnonationalism but they also present them selves to anyone who has indirectly experienced the prejudices unleashed by ethnonationalist forces This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological founda tions that underly the sense of belonging that is essential to nationalism No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment the latter has to be considered in any study of national ism *Education and Society* Joseph I. Zajda,2001 *Education and Society* third edition is a completely new edition of this popular text In fifteen wholly new chapters the authors outstanding educators writers and leaders in their particular fields focus on questions which have a highly current relevance for students of education in 2001 and beyond Future teachers for our twenty first century will read chapters which deal with such key issues as education for active citizenship democracy and education social identity conflict and education for peace social class in children s lives reconciliation and multiculturalism Asian values and human rights minority school settings marketing schools gender and ethnicity and achievement Information Technology education and new literacies and issues arising from emerging technology society relations in cyberspace and information technology dependence The new edition of *Education and Society* third edition complements the excellent selection of chapters in *Education and Society* and can be used in conjunction with the earlier edition in order to offer students a wide and stimulating introduction and overview to the major issues in the debate over the relationship between the school and the social and economic and political institutions which surround it inc
