Peter Collins

Principles Of Modern Architecture:

Principles of Modern Architecture Christian Norberg-Schulz, 2000 *Principles of Modern Architecture* is a clear concise accessible account of what the modern movement really wanted and what it achieved by one of the world's leading architectural critics Idea, Form, and Architecture Egon Schirmer, 1987 **Changing Ideals in Modern Architecture, 1750-1950** Peter Collins, 1998 *Changing Ideals in Modern Architecture* revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins's ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations

Permanent Cornelius Müller, 2022-06-15 **Changing Ideals in Modern Architecture, 1750-1950** Peter Collins, 1998-07-14 Collins explains what Revivalism Rationalism Eclecticism and Functionalism meant to those who practised them examining the impact that social forces and the other arts and sciences had on architectural styles while recognizing the tectonic continuities that underlie the seeming ruptures between pre modern modern and post modern approaches to design His work is infused with a deep sympathy for the classical spirit of the eighteenth century and he argued rigorously and passionately that Enlightenment ideas could be of real value to the architects of his generation particularly since technology had made it possible to use them effectively Collins's plea for sensitivity to tradition and the urban fabric while encouraging technological innovation and unprecedented programs makes his thought just as vital today as it was ahead of its time when first published Collins had long wished to see an affordable fully illustrated edition of his book and McGill Queen's University Press and the McGill School of Architecture are proud to at long last fulfil this wish The new edition includes a biographical sketch of Collins a brief publication history of the work and an introductory essay by Kenneth Frampton that discusses the importance of the work at the time it was first published and highlights its relevance for the architectural problems of today Like the classic works of Hitchcock Giedion Pevsner and Benevolo *Changing Ideals in Modern Architecture* is essential reading and forms a striking contrast with other works on modernism such as Reyner Banham's *It will be pertinent to all those interested in architectural history and theory modern history history of ideas and aesthetics* **Arieh Sharon and Modern Architecture in Israel** Eran Neuman, 2023-11-30 Arieh Sharon and *Modern Architecture in Israel Building Social Pragmatism* offers the first comprehensive survey of the work of Arieh Sharon and analyzes and discusses his designs and plans in relation to the emergence of the State of Israel A graduate of the Bauhaus Sharon worked for a few years at the office of Hannes Mayer before returning to Mandatory Palestine There he established

his office which was occupied in its first years in planning kibbutzim and residential buildings in Tel Aviv After the establishment of the State of Israel in 1948 Arie Sharon became the director and chief architect of the National Planning Department where he was asked to devise the young country's first national masterplan Known as the Sharon Plan it was instrumental in shaping the development of the new nation During the 1950s and 1960s Sharon designed many of Israel's institutions including hospitals and buildings on university campuses This book presents Sharon's exceptionally wide range of work and examines his perception of architecture in both socialist and pragmatist terms It also explores Sharon's modernist approach to architecture and his subsequent shift to Brutalist architecture when he partnered with Benjamin Idelson in the 1950s and when his son Eldar Sharon joined the office in 1964 Thus the book contributes a missing chapter in the historiography of Israeli architecture in particular and of modern architecture overall This book will be of interest to researchers in architecture modern architecture Israel studies Middle Eastern studies and migration of knowledge

Modern Architecture of the 1950s: A Decade of Change and Innovation Pasquale De Marco, 2025-04-10 The 1950s was a transformative decade for architecture and design The end of World War II brought a sense of optimism and a desire for a fresh start and this was reflected in the new buildings and homes that were constructed during this time This book provides a comprehensive overview of the architecture and design of the 1950s It explores the major architectural styles of the decade the work of key architects and designers and the impact of social cultural and economic factors on the built environment The book is divided into ten chapters each of which focuses on a different aspect of architecture and design in the 1950s The chapters cover topics such as the rise of new architectural styles the influence of technology and materials the changing role of the architect and the impact of urban planning and development The book is lavishly illustrated with photographs and drawings making it an essential resource for anyone interested in this fascinating period in architectural history Whether you are an architect a designer or simply someone who appreciates good design this book is sure to inspire and inform you

Modern Architecture and Climate Daniel A. Barber, 2023-04-11 How climate influenced the design strategies of modernist architects *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well

known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today s zero carbon design Contemporary Architecture Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools
