from Tyler's extensive career of connoisseurship brings together eight of the author's most notable essays reworked especially for this volume. Beautifully illustrated with more than 150 images, *Western Art: Western History* tells the stories of key artists, both famous and obscure, whose provocative pictures document the people and places of the nineteenth-century American West. The artists depicted in these pages represent a variety of personalities and artistic styles. According to Tyler, each of them responded in unique ways to the compelling and exotic drama that unfolded in the West during the nineteenth century: an age of exploration, surveying, pleasure travel, and scientific discovery. In eloquent and engaging prose, Tyler unveils a fascinating cast of characters, including the little-known German-Russian artist Louis Choris, who served as a draftsman on the second Russian circumnavigation of the globe; the exacting and precise Swiss artist Karl Bodmer, who accompanied Prince Maximilian of Wied on his sojourn up the Missouri River; and the young American Alfred Jacob Miller, whose seemingly frivolous and romantic depictions of western mountain men and American Indians remained largely unknown until the mid-twentieth century. Other artists showcased in this volume are John James Audubon, George Caleb Bingham, Alfred E. Mathews, and finally Frederic Remington, who famously sought to capture the last glimmers of the old frontier. A common thread throughout *Western Art: Western History* is the important role that technology, especially the development of lithography, played in the dissemination of images. As the author emphasizes, many works by western artists are valuable not only as illustrations but as scientific documents imbued with cultural meaning. By placing works of western art within these broader contexts, Tyler enhances our understanding of their history and significance.

A Research Guide to the Ancient World John M. Weeks, Jason de Medeiros, 2014-11-25 The archaeological study of the ancient world has become increasingly popular in recent years. *A Research Guide to the Ancient World: Print and Electronic Sources* is a partially annotated bibliography. The study of the ancient world is usually, although not exclusively, considered a branch of the humanities, including archaeology, art history, languages, literature, philosophy, and related cultural disciplines, which consider the ancient cultures of the Mediterranean world and adjacent Egypt and southwestern Asia. Chronologically, the ancient world would extend from the beginning of the Bronze Age of ancient Greece (ca. 1000 BCE) to the fall of the Western Roman Empire (ca. 500 CE). This book will close the traditional subject gap between the humanities (Classical World, Egyptology) and the social sciences (anthropological archaeology, Near East) in the study of the ancient world. This book is uniquely the only bibliographic resource available for such holistic coverage. The volume consists of 17 chapters and seven appendixes arranged according to the traditional types of library research materials: bibliographies, dictionaries, atlases, etc. The appendixes are mostly subject-specific, including graduate programs in ancient studies, reports,

from significant archaeological sites numismatics and paleography and writing systems These extensive author and subject indexes help facilitate ease of use Bibliotheca Americana. Architects and Intellectual Culture in Post-Restoration England Matthew Walker, 2017-10-13 Architects Builders and Intellectual Culture in Restoration England charts the moment when well educated well resourced English intellectuals first became interested in classical architecture in substantial numbers This occurred after the Restoration of the Monarchy in 1660 and involved people such as John Evelyn Robert Hooke Sir Christopher Wren and Roger North Matthew Walker explores how these figures treated architecture as a subject of intellectual enquiry either as writers as designers of buildings or as both In four substantial chapters it looks at how the architect was defined as a major intellectual figure how architects acquired material that allowed them to define themselves as intellectually competent architects how intellectual writers in the period handled knowledge of ancient architecture in their writing and how the design process in architecture was conceived of in theoretical writing at the time In all Walker shows that the key to understanding English architectural culture at the time is to understand how architecture was handled as knowledge and how architects were conceived of as collectors and producers of such knowledge He also makes the claim that architecture was treated as an extremely serious and important area of intellectual enquiry the result of which was that by the turn of the eighteenth century architects and architectural writers could count themselves amongst England s intellectual and cultural elite
