Projects as Arenas for Renewal and Learning Processes Rolf A. Lundin,Christophe Midler,2012-12-06 There is a growing tendency to organize various aspects of business life by projects and to set up temporary organizations in a competition where speed and adaptability becomes a major necessity Organizing by projects is perceived as a good way to ensure action and to stress the importance of getting work done However there is a need to balance the stress on action so that learning capabilities are not only retained but augmented Projects as Arenas for Renewal and Learning Processes provides examples of how different types of projects function from a learning or renewal perspective taken from a wide variety of real life environments in industrial and public organizations This book illustrates the mistaken habit of assuming too much in the project area for example project notions are in fact culture dependent classical market oriented contracting business relations do not fit with the learning dimension of projects and long term learning on core competencies and product development projects need to be connected The book is also intended to represent many of the research frontiers in the project field Enhancing learning capabilities is or should be of a mutual concern to researchers and managers alike

Sector-Led Urban Development Projects Erwin Heurkens, 2012-09-04 Central to Private Sector led Urban Development Projects lays the concept of private sector led urban development projects Such projects involve project developers taking a leading role and local authorities adopting a facilitating role in managing the development of an urban area based on a clear public private role division Such a development strategy is quite common in Anglo Saxon urban development practices but is less known in Continental European practices Nonetheless since the beginning of the millennium such a development strategy also occurred in the Netherlands in the form of concessions However remarkably little empirical knowledge is available about how public and private actors collaborate on and manage private sector led urban development projects Moreover it remains unclear what the effects of such projects are This dissertation provides an understanding of the various characteristics of private sector led urban development projects by conducting empirical case study research in the institutional contexts of the Netherlands and the UK The book provides an answer to the following question What can we learn from private sector led urban development projects in the Netherlands and UK in terms of the collaborative and managerial roles of public and private actors and the effects of their interactions **Managing Networks in**

Project-Based Organisations Stephen Pryke, 2017-09-25 The first book demonstrating how to apply the principles of social network analysis to managing complex projects This groundbreaking book gets project managers and students up to speed on state of the art applications of social network analysis SNA for observing analysing and managing complex projects Written by an expert at the leading edge of the SNA project management movement it clearly demonstrates how the principles of social network analysis can be used to provide a smarter more efficient holistic approach to managing complex projects Project managers especially those tasked with managing large complex construction and engineering projects traditionally have relied upon analysis and decision making based upon hierarchical structures and vaguely defined project systems much of which is borrowed from historic scientific management approaches However it has become apparent that a more sophisticated methodology is required for observing project systems and managing relationships with today's more knowledgeable and demanding clients Social network analysis SNA provides just such an approach Unfortunately existing books on social network analysis are written primarily for sociologists and mathematicians with little or no regard for the needs of project managers until now The first and only book of its kind Managing Networks in Project Based Organisations Offers a framework and a fully developed approach to applying SNA theory and methodologies to large complex projects

Describes highly effective strategies and techniques for managing the iterative and transient relationships between network defining actor roles involved in the delivery of complex projects Uses numerous real world examples and case studies of successful applications of SNA to large scale construction and engineering projects around the world Draws on its author's decades of experience managing complex projects for demanding clients as well as his extensive academic research in Project Management Managing Networks in Project Based Organisations is an important working resource for project management professionals and consultants especially those serving the construction and engineering industries It is also an excellent text reference for postgraduate students of project management and supply chain management as well as academic researchers of project management
