Redefining Self Help:

Redefining Self-Help Frank Riessman, David Carroll, 1995-03-22 The statistics are staggering eleven million people in the United States suffer from psychological depression one in four have been abused as children and ten million Americans are alcoholics It is vital to deal with these problems in a responsible manner Yet the sheer numbers of people who need help have long ago outstripped our health care human service and educational systems ability to cope *Redefining Self Help* shows how those in the educational health care and human service fields can reclaim a sense of power by focusing on the vitality of individuals individuals who gain their strength from a community of people who share common experiences Highlighting the success of thousands of self help groups the authors offer professionals and nonprofessionals a new paradigm one that views people with problems as resources Using illustrative examples from hundreds of self help groups MAnded Hearts Alcoholics Anonymous Stroke Clubs Recovery Inc school centered peer groups Compassionate FriAnds SHARE Mental Health Consumers Association National Alliance for the Mentally Ill and M A D D the authors demonstrate how educational health care and human service organizations can be transformed by tapping into the power of self help organizations Riessman and Carroll offer up to date information on the activities of self help organizations around the country describe how individuals such as diabetics and smokers helping themselves are part of the movement explore the implications of the enormous increase of professionals working with self help groups and make practical suggestions for improving performance when working with these organizations and examine a number of self help organizations outlining the organization model and principles that have contributed to their success

Understanding Self-help/mutual Aid Thomasina Borkman, 1999 Self help groups have encountered fierce criticism as places where individuals join to share personal problems and to engage in therapeutic intervention without the aid of skilled professionals These groups have flourished since the 1970s and continue to serve more people than professional therapy Yet these groups have been criticized as fostering a culture of whiners and victims and not using professional help as needed Thomasina Jo Borkman debunks this commonly held assessment and also examines the reasons for these groups enduring popularity since the 1960s more people attend these meetings word than see professional therapists What accounts for their success and popularity *Understanding Self Help Mutual Aid Groups* is the first book to describe three stages of individual and group evolution that is part of this organization s very structure it also reconceptualizes participants interactions with professionals The group as a whole Borkman posits draws on the life experiences of its membes to foster nurturing support and transformation through a circle of sharing Groups create more positive and less stigmatizing meaning perspectives of the members problems than is available from professionals or lay folk culture
