Reducing Nuclear Arsenals:

Reducing Nuclear Arsenals Carlo Schaerf, David Carlton, 1991-06-18 This volume contains the proceedings of the Third Castiglioncello International Conference on Nuclear Arsenals Reduction Perspectives and Consequences which took place in Livorno Italy from 22 to 25 September 1989

The Opportunity Steven Pifer, Michael E. O'Hanlon, 2012-10-05 For some observers nuclear arms control is either a relic of the cold war or a utopian dream about a denuclearized planet decades in the future But as Brookings scholars Steven Pifer and Michael O Hanlon argue in The Opportunity arms control can address some key security challenges facing Washington today and enhance both American and global security Pifer and O Hanlon make a compelling case for further arms control measures to reduce the nuclear threat to the United States and its allies to strengthen strategic stability to promote greater transparency regarding secretive nuclear arsenals to create the possibility for significant defense budget savings to bolster American credibility in the fight to curb nuclear proliferation and to build a stronger and more sustainable U S Russia relationship President Obama gave priority to nuclear arms control early in his first term and by all accounts would like to be transformational on these questions Can there be another major U S Russia arms treaty Can the tactical and surplus strategic nuclear warheads that have so far escaped controls be brought into such a framework Can a modus vivendi be reached between the two countries on missile defense And what of multilateral accords on nuclear testing and production of fissile materials for nuclear weapons Pifer and O Hanlon concisely frame the issues the background and the choices facing the president provide practical policy recommendations and put it all in clear and readable prose that will be easily understood by the layman

Tactical Nuclear Weapons and Euro-Atlantic Security Paolo Foradori, 2013-07-18 This book offers a comprehensive examination of the important security issue of tactical nuclear weapons in Europe Nuclear nonproliferation and disarmament have returned to the top of the international political agenda The issue assumes particular importance in regard to NATO given that some 150 200 US tactical nuclear weapons TNWs are still present in five countries belonging to the Alliance Belgium Germany Italy the Netherlands and Turkey The past few years have seen animated debate in the United States and Europe on the role of such weapons in the current scenario of international security and whether they can be further reduced or completely removed from Europe Bringing together leading scholars and analysts of TNW with country specific competences this volume improves our understanding of this debate by providing in depth analysis of the presence role perceived value and destiny of TNWs in Europe The book addresses the issue in a systematic manner taking into account the perspectives of all main actors directly or indirectly involved in the debate This approach provides new and important insights that can inform both theoretical and policy work on a very critical and timely international issue especially during the ongoing review of NATO's deterrence and defence posture This book will be of much interest to students of European politics European security nuclear proliferation and IR in general

US Nuclear Weapons Policy After the Cold War Nick Ritchie, 2008-08-08 This book offers an in depth

examination of America's nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in policy It provides a detailed analysis of the complex evolution of policy the factors affecting policy formulation competing understandings of the role of nuclear weapons in US national security discourse and the likely future direction of policy The book argues that US policy has not proceeded in a linear rational and internally consistent direction and that it entered a second post Cold War phase under President George W Bush However domestic political processes and lack of political and military interest in America's nuclear forces have constrained major shifts in nuclear weapons policy This book will be of much interest to students of US foreign policy nuclear proliferation strategic studies and IR in general

Nuclear Weapons, Scientists, and the Post-Cold War Challenge Sidney David Drell, 2007 This volume includes a representative selection of Sidney Drell's recent writings and speeches circa 1993 to the present on public policy issues with substantial scientific components Most of the writings deal with national security nuclear weapons and arms control and reflect the author's personal involvement in such issues dating back to 1960 Fifteen years after the demise of the Soviet Union the gravest danger presented by nuclear weapons is the spread of advanced technology that may result in the proliferation of nuclear weapons Of most concern would be their acquisition by hostile governments and terrorists who are unconstrained by accepted norms of civilized behavior The current challenges are to prevent this from happening and at the same time to pursue aggressively the opportunity to escape from an outdated nuclear deterrence trap
