Reducing Poverty An Institutional Perspective:

Reducing Poverty Lawrence F. Salmen, 1992 Business, Entrepreneurship and Innovation Toward Poverty Reduction Steven Si, David Ahlstrom, Wei Jiang, John Cullen, 2021-07-26 Ways in which poverty can be reduced in both countries and regions through business entrepreneurship and government has been a hot issue for researchers and policymakers in recent years Governments can play an important role in helping the poor people by non profit organizations and others that help to seed business among the poor Businesses increasingly also see the large number of people in severe poverty not only as an issue for social concern but also as a potentially large untapped market of consumers for goods and services Some scholars have called for poverty reduction through entrepreneurship owing to the fact that it can be an efficient path to also change the poor s attitudes and behaviours from a passive mode to a more active mode towards poverty reduction economically and socially In addition the sharing economy brings opportunities where everyone is a micro entrepreneur There is a recognition that these types of entrepreneurship above could offer the greatest single potential means to move individuals out of poverty in the nations and regions in the next 5 10 years This book provides new and valuable analyses of poverty and business entrepreneurship and innovation in current nations and regions including developing and developed countries As business entrepreneurship and innovation can help to generate greater business activity in settings of severe poverty they will help to solve poverty as individuals in severe poverty are able to both generate greater incomes and accumulate greater assets as they participate with large firms in those activities The chapters in this book were originally published as a special issue of the Entrepreneurship Regional Development Seeing Like an International Organization André Broome, Leonard Seabrooke, 2017-12-22 This book contributes to the study of International Organizations IOs by providing a sharp focus on how IOs analytic institutions interact with states over key policy issues Analytic institutions include the areas departments committees adjudicatory bodies and others housed by or linked to IOs that develop the cognitive framework for identifying understanding and solving policy problems Analytic institutions make the state legible to IOs and are the key means for how IOs see their member states shaping how international political and economic problems are understood This book investigates why seeing like an IO matters through cases on leading organizations for global economic governance including the International Monetary Fund the World Bank the Bank for International Settlements the Organisation for Economic Co Operation and Development and the World Trade Organization The contributors demonstrate the benefits of studying IOs from the inside out to enrich our understanding of why issues in the international political economy are governed the way they are This book was published as a special issue of New Political Economy **Sociology, Anthropology, and Development** Michael M. Cernea, April L. Adams, 1994-01-01 Environmentally Sustainable Development Studies and Monograph Series No 3 A listing of works published by World Bank sociologists and anthropologists this bibliography serves as a vehicle for exchanging experiences and promoting interdisciplinary Institutional Development Ronald

Policy Reform for Sustainable Development in the Caribbean Michele Garrity,Louis A. Picard,1996 The Caribbean countries and many other Third World countries in Latin America Asia and Africa have been under the yoke of structural adjustment measures for more than a decade Numerous studies have addressed the inequality of North South relations the lack of transparency in negotiations that have led to the signature of agreements the absence of a clear definition of responsibilities of the parties engaged the inadequacy and inadaptation of policies with regard to the socio cultural context and especially the refusal to take into account the social demands of the most deprived The criticisms formulated in this book can only find a beginning of solutions by the setting up of a solid administrative organization in which the public officials are made accountable and who once aware of the national and international stakes can confront the constraints involved in State international negotiation relations The book is a very rich presentation of the concept and the problems of structural adjustment and institutional

development in the developing countries Beside the impressive introduction and the convincing conclusion the articles on these prerequisites for institutional sustainability present the most important empirical research results The contents is a clear description of problems failures and results in institutional reforms Reflections on Water Joachim Blatter,Helen M. Ingram,2001 This book offers conceptual and empirical support for the idea that the human relationship with water must move beyond rationalist definitions of water as product property and commodity
