Detels, Quarraisha Abdool Karim, Fran Baum, Liming Li, Alastair H Leyland, 2021-10-29 The Oxford Textbook of Global Public Health is the ultimate resource on the subject of public health and epidemiology. It offers a global and comprehensive perspective on wide ranging public health needs and priorities in modern health care. Thoroughly revised and updated for the seventh edition, the book is split into three main topics. The Scope of Public Health covers the development of the discipline, determinants of health and disease, and policies, law and ethics. The second volume focuses on The Methods of Public Health, including the science of epidemiology, social science techniques, and environmental techniques. Finally, The Practice of Public Health is fully explored with sections on specific public health problems, ways of prevention and control, the varying needs of different populations, and the functions of public health services and professionals. Three new editors have joined for this edition: Liming Li, China; Fran Baum, Australia; and Alastair H Leyland, UK, complimenting Quarraisha Abdool Karim, South Africa, and Roger Detels, USA, for a truly global perspective on public health. Featuring over 225 contributors from countries all over the world, ensures that the book covers public health from all aspects, with vastly different health systems and priorities. Featuring new chapters on gender identity and gender based violence, environmental health, and climate change, genomics, and epidemiology, and emerging and re-emerging infectious diseases, the seventh edition of the Oxford Textbook of Global Public Health remains the most comprehensive text on the subject and is a vital resource for public health practitioners and trainees, clinical epidemiologists, and students in the field.

Pediatric Trauma David E. Wesson, Bindi Naik-Mathuria, 2017-05-18 Injuries cause more than half of all childhood deaths, and a large proportion of pediatric trauma care is provided by non-pediatric specialists. This book provides an update of current practice backed by evidence-based recommendations in four sections: 1. Trauma systems for children, including epidemiology, organization of pediatric trauma care, disaster planning, and systems for mass pediatric casualties and community injury prevention programs; 2. General principles of resuscitation and supportive care; 3. Specific injuries commonly seen in children, including child abuse; 4. Rehabilitation, communication, long-term outcomes, and performance improvement methods to monitor outcomes.

The Reality of Research with Children and Young People Vicky Lewis, Mary Kellett, Chris Robinson, Sandy Fraser, Sharon Ding, 2012-06-21 The Reality of Research with Children and Young People illustrates the process of carrying out research through thirteen research stories. Each story includes a piece of published research accompanied by a commentary from the author of the research explaining the origins of the research, how research questions were formed, factors influencing the choice of methodology and data collection techniques, problems that arose, and how these were dealt with, personal reflections on the project. The research examples included in this volume have been carefully selected to demonstrate the reality of researching with children from pre-school age to late adolescence. They reflect the different traditions and variety of methods of collecting data, including interview, evaluation, ethnography, experiment, survey, case study, questionnaire, longitudinal, and standardised assessment. The Reality of Research with Children and Young People provides valuable insights into the process of

research for students and professionals in a range of fields including education health welfare childhood and youth Studies psychology and sociology The book was developed to accompany The Open University Course Research with Children and Young People EK310
