outdated organization processes and culture of a company is corporate America's greatest challenge today. In *Reengineering Management*, Champy examines the far-reaching changes managers must make for themselves and their companies to succeed in an era of unprecedented competition. Through his extensive consulting and research work, he shows how reengineering succeeds only when managers reinvent their own jobs and managerial styles. Otherwise, the ultra-efficient and effective reengineered processes for acquiring and serving customers, filling orders, bringing new concepts to market, and other key business activities eventually fall apart. Champy illustrates this new management agenda through first-hand experiences of managers of reengineered operations at Federal Express, Wisconsin Electric, CIGNA, Health Care, Hewlett-Packard, AT&T, Universal Card Services, and other companies. Champy shows how they are mastering the managerial challenges of reengineering and, as a result, are making their organizations exciting and competitive. As more and more organizations reengineer, the experiences of these managers will become an insider's guide to managerial life in the company of the future. *Reengineering Management* picks up where *Reengineering the Corporation* left off by exploring the managerial implications of the reengineered workplace. As reengineering becomes critical to all organizations, *Reengineering Management* will be the road map for managerial success in the future. It is indeed the manifesto for the next managerial revolution.

Beyond Reengineering is not about reengineering it is about the shape of tomorrow's business. To succeed or even to survive in today's global economy companies must refocus and reorganise themselves around their core processes the end to end sequences of tasks that create customer value. The process centred organisation signifies a complete break with the past and as such marks the end of the Industrial Revolution and of the organisations that were designed for it. It means the end of narrow jobs supervisory management traditional career paths and feudal cultures and ushers in a new era of flexibility. For a world of process centred organisation everything must be rethought the kinds of work that people do the jobs they hold the skills they need the careers they follow the roles managers play and the principles of strategy that companies follow.
