Reference And Anaphoric Relations:

Reference and Anaphoric Relations H.K. von Stechow, U. Egli, 2001-11-30 The notions of reference and anaphoric relations have been discussed since antiquity and they are still one of the most challenging subjects in linguistics logics and philosophy of language The quest for a satisfying account of anaphoric reference has initiated a wide range of new and interesting approaches in formal semantics and recent research confirms the old insight that reference and anaphoricity are closely interrelated issues This volume brings together fifteen original research articles on the representation and interpretation of indefinite and definite noun phrases anaphoric pronouns and closely related issues such as scope and quantifier movement The analyses are worked out within discourse representation theory file change semantics and dynamic logic a family of recent frameworks developed for the formal analysis of discourse semantics Particular attention is paid to E type theories of pronouns and to the use of choice functions in the semantics of noun phrases The papers collected in this volume shed light on the question of how linguistic expressions establish reference and anaphoric relations The use of choice function approaches within dynamic semantics opens new research perspectives on these questions Audience This book will be of interest to scholars and students of linguistics logicians philosophers of language computational linguists and computer scientists with an interest in the semantics of natural language

The Oxford Handbook of Reference Jeanette

Gundel, Barbara Abbott, 2019-02-07 This handbook presents an overview of the phenomenon of reference the ability to refer to and pick out entities which is an essential part of human language and cognition In the volume s 21 chapters international experts in the field offer a critical account of all aspects of reference from a range of theoretical perspectives Chapters in the first part of the book are concerned with basic questions related to different types of referring expression and their interpretation They address questions about the role of the speaker including speaker intentions and of the addressee as well as the role played by the semantics of the linguistic forms themselves in establishing reference This part also explores the nature of such concepts as definite and indefinite reference and specificity and the conditions under which reference may fail The second part of the volume looks at implications and applications with chapters covering such topics as the acquisition of reference by children the processing of reference both in the human brain and by machines The volume will be of interest to linguists in a wide range of subfields including semantics pragmatics computational linguistics and psycho and neurolinguistics as well as scholars in related fields such as philosophy and computer science

Reference to Abstract Objects in Discourse Nicholas Asher, 2012-12-06 Reference to Abstract Objects in Discourse presents a novel framework and analysis of the ways we refer to abstract objects in natural language discourse The book begins with a typology of abstract objects and related entities like eventualities After an introduction to bottom up compositional discourse representation theory DRT and to previous work on abstract objects in DRT notably work on the semantics of the attitudes the book turns to a semantic analysis of eventuality and abstract object denoting nominals in English The book then substantially revises and

extends the dynamic semantic framework of DRT to develop an analysis of anaphoric reference to abstract objects and eventualities that exploits discourse structure and the discourse relations that obtain between elements of the structure A dynamic semantically based theory of discourse structure SDRT is proposed along with many illustrative examples Two further chapters then provide the analysis of anaphoric reference to propositions VP ellipsis The abstract entity anaphoric antecedents are elements of the discourse structures that SDRT develops The final chapter discusses some logical and philosophical difficulties for a semantic analysis of reference to abstract objects For semanticists philosophers of language computer scientists interested in natural language applications and discourse philosophical logicians graduate students in linguistics philosophy cognitive science and artificial intelligence Switch-Reference and Discourse Representation Lesley Stirling,1993-03-11 This book argues that types of anaphoric linkage across clause boundaries cannot be adequately accounted for by Binding Theory proposing instead an account for them which is formalised in Discourse Representation Theory Connectionist, Statistical and Symbolic Approaches to Learning for Natural Language Processing Stefan Wermter, Ellen Riloff, Gabriele Scheler,1996-03-15 This book is based on the workshop on New Approaches to Learning for Natural Language Processing held in conjunction with the International Joint Conference on Artificial Intelligence IJCAI 95 in Montreal Canada in August 1995 Most of the 32 papers included in the book are revised selected workshop presentations some papers were individually solicited from members of the workshop program committee to give the book an overall completeness Also included and written with the novice reader in mind is a comprehensive introductory survey by the volume editors The volume presents the state of the art in the most promising current approaches to learning for NLP and is thus compulsory reading for researchers in the field or for anyone applying the new techniques to challenging real world NLP problems **The Bloomsbury Companion to the Philosophy of Language** Manuel Garcia-Carpintero, Max Kölbel,2014-09-25 Beginning with works of Frege Russell and Wittgenstein The Bloomsbury Companion to the Philosophy of Language provides a critical history of the core concepts in the area From generative syntax and formal semantics to broader philosophical issues such as intentional contexts theories of meaning and context dependence a well known team of experts offer insightful analysis into some of the fundamental questions asked by the philosophy of language The result is a comprehensive introduction featuring a series of research tools including an A to Z of key terms and concepts a detailed list of resources and a fully annotated bibliography For students and scholars looking to better understand the questions and debates informing the subject this is an essential study tool *Anaphora in Generative Grammar* Thomas Wasow,1979-01-01 Intuitively it is clear why languages have anaphoric relations anaphora reduces redundancy thereby shortening and hence simplifying sentences In order for this simplification to be possible however it is necessary that the speaker of a language be able to identify correctly the elements participating in an anaphoric relation and to determine correctly the meaning of the anaphor on the basis of meaning of the antecedent If a grammar is to reflect the linguistic competence of a native speaker of

a language it must include mechanisms of associating anaphor and antecedent In this volume the following questions will be considered What sorts of mechanisms are best suited for representing anaphora in a grammar What are the conditions on the rule s associating anaphors with antecedents Do the various cases of anaphora form a linguistically significant class of phenomena and if so how can the grammar capture this fact And what do these answers entail for linguistic theory *The Processing and Acquisition of Reference* Edward Gibson, Neal J. Pearlmutter, 2011 This book brings together contributions by prominent researchers in the fields of language processing and language acquisition on topics of common interest how people refer to objects in the world how people comprehend such referential expressions and how children acquire the ability to refer and to understand reference *Grammar of Etulo* Chikelu I. Ezenwafor-Afuecheta, 2025-10-20 This work provides the first detailed linguistic description of the grammar of Etulo a language spoken in Nigeria by a minority group in Benue and Taraba states This description establishes Etulo as a tone language characterised by a predominant SVO word order non inflectional morphology prominent aspectual values obligatory complement verbs and verb serialization among other features This grammar also serves as a foundation for further description of the Etulo grammar and for the development of pedagogical materials needed in Etulo language teaching Within the Benue Congo sub group of languages Etulo is classified as an Idomoid language alongside seven other languages with which it shares striking linguistic similarities These include Idoma Igede Yatye Alago Akweya Akpa and Eloyi none of which has yet received a robust linguistic description in the form of a grammar This work therefore serves as a reference work not only for Etulo but also for other Idomoid languages yet to be described This volume will be of interest to researchers of African linguistics in general and Idomoid languages in particular as well as Africanists comparative linguists and language typologists more generally Reference and Referent Accessibility Thorstein Fretheim, Jeanette K. Gundel, 1996-01-01 The papers in this volume are concerned with the question of how a speaker s intended referent is interpreted by the addressee Topics include the interpretation of coreferential vs disjoint reference the role of intonation syntactic form and animacy in reference understanding and the way in which general principles of utterance interpretation constrain possible interpretations of referring expressions The collection arises from a workshop on reference and referent accessibility which was held at the 4th International Pragmatics Conference in Kobe Japan July 25 30 1993
