Reforming The Poor Welfare Policy Federalism And Morality:

The Failed Welfare Revolution Brian Steensland, 2017-10-31 Today the United States has one of the highest poverty rates among the world's rich industrial democracies. The Failed Welfare Revolution shows us that things might have turned out differently. During the 1960s and 1970s, policymakers in three presidential administrations tried to replace the nation's existing welfare system with a revolutionary program to guarantee Americans basic economic security. Surprisingly from today's vantage point, guaranteed income plans received broad bipartisan support in the 1960s. One proposal, President Nixon's Family Assistance Plan, nearly passed into law in the 1970s, and President Carter advanced a similar bill a few years later. The failure of these proposals marked the federal government's last direct effort to alleviate poverty among the least advantaged and ironically sowed the seeds of conservative welfare reform strategies under President Reagan and beyond. This episode has largely vanished from America's collective memory. Here Brian Steensland tells the whole story for the first time from why such an unlikely policy idea first developed to the factors that sealed its fate. His account, based on extensive original research in presidential archives, draws on mainstream social science perspectives that emphasize the influence of powerful stakeholder groups and policymaking institutions. But Steensland also shows that some of the most potent obstacles to guaranteed income plans were cultural. Most centrally, by challenging Americans' longstanding distinction between the deserving and undeserving poor, the plans threatened the nation's cultural, political, and economic status quo. Senate. Committee on Finance, 1978 [Gender and the Politics of Welfare Reform](#) Joanne L. Goodwin, 2007-12-01 The first study to explore the origins of welfare in the context of local politics, this book examines the first public welfare policy created specifically for mother-only families. Chicago initiated the largest mothers' pension program in the United States in 1911. Evolving alongside movements for industrial justice and women's suffrage, the mothers' pension movement hoped to provide justice for mothers and protection from life's insecurities. However, local politics and public finance derailed the policy, and most women were required to earn. Widows were more likely to receive pensions than deserted women and unwed mothers. And African American mothers were routinely excluded because they were proven breadwinners yet did not compete with white men for jobs. Ultimately, the once-uniform commitment to protect motherhood faltered on the criteria of individual support and wage earning, becoming a major component of the policy. This revealing study shows how assumptions about women's roles have historically shaped public policy and sheds new light on the ongoing controversy of welfare reform. **Departments of Labor and Health, Education, and Welfare**
