Returning The Gift

Charles Stafford

Returning The Gift:

Returning the Gift Rebecca Colesworthy, 2018-11-10 From debates about reparations to the rise of the welfare state the decades following World War I saw a widespread turn across disciplines to questions about the nature and role of gifts What is a gift What do gifts mean and do Which individuals and institutions have the authority to give Marshalling wide ranging interdisciplinary research *Returning the Gift* argues that these questions centrally shaped literary modernism The book begins by revisiting the locus classicus of twentieth century gift theory the French sociologist Marcel Mauss's 1925 essay *The Gift: The Form and Reason for Exchange in Archaic Societies* His title notwithstanding the gift Mauss envisions is not primitive or pre capitalist but rather a distinctively modern phenomenon Subsequent chapters offer sustained nuanced readings of novels and nonfiction by Virginia Woolf Jean Rhys Gertrude Stein and H D from the 1920s to 1940s underscoring the ways their writing is illuminated by contemporaneous developments in the social sciences economics and politics while also making a case for their unique contributions to broader debates about gifts Not only do these writers insist that literature is a special kind of gift but they also pose challenges to the gift's feminization in the work of both their Victorian forebears and contemporary male theorists Each of these writers uses tropes and narratives of giving of hospitality sympathy reciprocity charity genius and kinship to imagine more egalitarian social possibilities under the conditions of the capitalist present The language of the gift is not as we might expect a mark of hostility to the market so much as a means of giving form to the society in market society of representing everyday experiences of exchange that the myth of the free market works even now to render unthinkable

The Gift in the Economy and Society Stefan Kesting, Ioana Negru, Paolo Silvestri, 2020-12-28 Mainstream economics offers a perspective on the gift which is constructed around exchange axioms of self interest instrumental rationality and utility maximisation concepts that predominate within conventional forms of economic analysis Recognising the gift as an example of social practice underpinned by social institutions this book moves beyond this utilitarian approach to explore perspectives on the gift from social and institutional economics Through contributions from an

international and interdisciplinary cast of authors the chapters explore key questions such as what is the relationship between social institutions on the one hand and gift exchange reciprocity on the other What are the social mechanisms that underpin gift and gift giving actions And finally what is the relationship between individuals societies gift giving and cooperation The answers to these questions and others serve to highlight the importance of the analysis of gift in economics and other social sciences The book also demonstrates the potential of the analysis of the gift to contribute to solving current problems for humanity at various levels of social aggregation This key text makes a significant contribution to the literature on the gift which will be of interest to readers of heterodox economics social anthropology philosophy of economics sociology and political philosophy

Profit and Gift in the Digital Economy Dave Elder-Vass,2016-06-24 Our economy is neither overwhelmingly capitalist as Marxist political economists argue nor overwhelmingly a market economy as mainstream economists assume Both approaches ignore vast swathes of the economy including the gift collaborative and hybrid forms that coexist with more conventional capitalism in the new digital economy Drawing on economic sociology anthropology of the gift and heterodox economics this book proposes a groundbreaking framework for analysing diverse economic systems a political economy of practices The framework is used to analyse Apple Wikipedia Google YouTube and Facebook showing how different complexes of appropriative practices bring about radically different economic outcomes Innovative and topical Profit and Gift in the Digital Economy focusses on an area of rapid social change while developing a theoretically and politically radical framework that will be of continuing long term relevance It will appeal to students activists and academics in the social sciences

marketplace The author argues that Japanese practices of giving and receiving challenge assumptions related to this idea of the gift

Gifts and Interests Antoon Vandervele,2000 According to a common understanding of economics economists attempt to understand and explain societal reality in the light of individual self interest For them a gift is no exception to this except for the slight and misleading veil of altruism which covers a purely egoistic motivation On the other hand theologians philosophers and ethicists use a more normative concept of man Man realises his best potential through deeds of selfless sacrifice that remain unknown to everyone In reality however people are either entirely egoistic nor altruistic Marcel Mauss model of the gift is interesting because it seems to escape the classical or rather modern egoism altruism dichotomy Gifts are not primarily motivated by the well being of myself or the other but rather by the desire to bring about or maintain a certain kind of social relation between giver and receiver Altruistic as well as egoistic motivations are an integral part of that relation The role of gifts in the constitution of social relations and social cohesion explains why most kinds of gifts are reciprocal and even obligatory In this book anthropologists sociologists and economists as well as philosophers focus on the question of the relevance of Mauss work on the gift for the understanding of actual social phenomena
