Legal Principles in WTO Disputes Andrew D.

Mitchell, 2008-12-11 Principles play a crucial role in any dispute settlement system and the World Trade Organization WTO is no exception However WTO Panels and the Appellate Body have been too timid in using principles sometimes avoiding their use when appropriate and at other times using them without fully acknowledging that they are doing so Perhaps more worryingly these bodies often fail to delve deeply enough into principles They tend to overlook key questions such as the legal basis for using a given principle whether the principle is being used in an interpretative manner or as applicable law and the meaning of the principle in public international law This book establishes a framework for addressing these

questions The use of such a framework should allay fears and misconceptions about the use of principles and ensure that they are used in a justifiable manner improving the quality of dispute settlement in the WTO

Good Faith in Transnational Law Frédéric Gilles Sourgens, 2022-09-12 Transnational law currently appears fragmented and captured by self interested corporate actors Good faith is at the heart of this fragmentation To defend transnational law thus requires an account of good faith Good Faith in Transnational Law explains and recasts fragmentation and capture as something valuable and casts good faith as an obligation of other regarding communicative conduct Fr d ric Gilles Sourgens argues that the fragmentation we experience is a virtue for communication across vastly different commercial economic social cultural and linguistic contexts to remain legally meaningful we must translate our different expectations into a shared context bound idiom He argues that law harnesses stress of such translations through stress fields that reintegrate the different experiences in a shared transnational discourse

Forum Shopping Despite Unification of Law Franco Ferrari, 2021-08-16 Watch the interview with Franco

Ferrari on Forum Shopping Despite Unification of Law According to some commentators forum shopping is an evil that must be eradicated It has been suggested that the unification of substantive law through international conventions constitutes one way to achieve this outcome This book shows that the drafting of uniform substantive law convention cannot prevent forum shopping The reasons are classified into two main categories convention extrinsic and convention intrinsic reasons The former category comprises those reasons upon which uniform substantive law conventions do not have an impact at all These reasons range from the costs of access to justice to the bias of potential adjudicators to the enforceability of judgments The convention intrinsic reasons on the other hand are reasons that relate to the nature and design of uniform substantive law conventions and include their limited substantive and international spheres of application as well as their limited scope of application the need to provide for reservations etc This book also focuses on another reason why forum shopping cannot be overcome the impossibility of ensuring uniform applications and interpretations of the various uniform substantive law conventions

Good Faith in Long-Term Relational Supply Contracts in the Context of Hardship from A Comparative Perspective Peng Guo, 2021-11-09 This book provides fair and acceptable solutions to hardship issues in long term relational supply contracts This book uses an approach to strike a balance between the traditional approach underlying classical contract law which emphasises the almost absolute prevalence of the principle of pacta sunt servanda and a flexible approach that is based on the principle of clausula rebus sic stantibus This book argues for an emerging principle of pacta sunt servanda bona fide on the basis of the relational contract theory Additionally this book demonstrates how good faith can serve as a foundation for imposing a duty to renegotiate on the parties The aim of this book is rather to propose how relational contract theory can be applied to the analysis of specific legal

rules in general Lastly this book highlights how the duty to renegotiate and the power to adapt a contract can be further developed upon the occurrence of hardship based on good faith and the relational nature and characteristics of a long term relational supply contract This book explores and enriches the existing research on relational contract theory concentrates primarily on its application in domestic contract laws particularly in the regulation of long term contracts in American contract law As an outcome this book provides a more feasible and satisfactory approach for courts or arbitral tribunals to undertake when facing hardship issues in international contract disputes Overall hardship themes long term relational supply contracts and good faith are examined extensively *The Governing Law of Companies in EU Law* Justin

Borg-Barthet,2012-04-09 The manner in which the governing law of companies is determined has attracted much attention from academics and practitioners alike ever since the European Court of Justice began receiving references for preliminary rulings regarding the compatibility of protective conflict of corporate law norms with the EC Treaty provisions concerning freedom of establishment Although recent developments have been less controversial than the ground breaking judgment in Centros they have not only consolidated the general thrust of liberalisation occasioned by the Court of Justice but have added new dimensions to the regulatory landscape These developments include amendments to the European constitutional order enshrined in the Lisbon Treaty European legislation on cross border mergers the proposed statute for a European Private Company the judgment of the Court of Justice in Cartesio and a Commission communication that contemplates the introduction of legislation on the governing law of companies This book examines these recent developments and appraises the current law as well as the foreseeable trajectory of the law within a theoretical setting that addresses the socio economic and legal theoretical concerns associated with choices of the governing law of companies In addition to considering the present and probable future state of EU law the book also develops new theoretical perspectives and proposes novel solutions to long standing dilemmas In particular it suggests that the use of information technology may render possible previously impossible compromises between party autonomy and the proper locus of prescriptive sovereignty Internet
