Reviews In Ecology Desert Conservation And Development:

International Environmental Law and Policy in Africa B. Chaytor, K.R. Gray, 2013-11-11 C O OKID11 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R Gray and Beatrice Chaytor It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal towards which I have had an undivided focus over the last two decades There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority This belief prevails strongly in many quarters of the industrialised countries In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston's 1979 thesis that Pollution Prevention Pays 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries

Reviews in Ecology Hala Nayel Barakat, Ahmad K. Hegazy, 1997 *Sustainable Land Use in Deserts* Siegmund-W. Breckle, Maik Veste, Walter Wucherer, 2012-12-06 Changing desert areas for land use implies a lot of ecological problems These and related ones are dealt with in this book covering various interdisciplinary and international aspects Large areas in arid and semi arid regions are already polluted in various ways One of the biggest problems is the anthropogenic salinization by inadequate means of agriculture and irrigation Additionally most arid areas in the world are dramatically overgrazed Methods and practices of a sustainable land use in deserts are urgently needed in many arid regions This book gives a broad survey on some of the affected regions of the world as well as some case studies from elsewhere Aral Sea Negev desert Namib desert etc Thus basic and applied sciences are brought together Water management in deserts grazing systems or reclamation of desertified areas are among the topics of this book as well as social and economic aspects

Bedouins by the Lake Ahmed Belal, 2009 Sustainable development and environmental change have become two of the watchwords of the new century But what do they mean for ordinary people living in some of the harshest environments in the world where survival is the driving force This book sets out to examine these issues and how they affect and are affected by Bedouin communities living in the arid areas of the Nubian Desert in southeastern Egypt Written by a joint Egyptian Russian and British research team this book seeks to examine how the Bedouin of this area have coped with the environmental changes brought about after the construction of the Aswan High Dam and resulting formation of Lake Nasser After documenting the nature of these changes the authors show the practical and strategic ways in which the Bedouin have responded by adapting both their use of environmental resources and the social and economic dimensions of their community Bedouins by the Lake argues that people in these communities are active agents of change and must not be seen as passive victims For them sustainable development and environmental change are not abstract academic debates but real life

everyday issues around which they must organize their lives

Plant Responses to Hyperarid Desert Environments

Monier M. Abd El-Ghani, Francisco Martín Huerta-Martínez, Liu Hongyan, Rahmatullah Qureshi, 2017-11-10 This book provides a comprehensive discussion on plant responses in hyperarid regions of Egypt China Mexico and Pakistan It describes their location physiographic features accidental vegetation along two transects endangered vegetation species human impact and variety of plant types e g climbing succulent and parasitic Studies on biotic and abiotic interactions plant biodiversity and soil plant relationships are also covered Covering a wide range of plant conditions and adaptations this book analyzes what happens when plants must endure very high temperatures and aridity Plants have adapted by evolving their physical structure to store and conserve water Examples are the absence of leaves which reduces transpiration and the growth of extremely long roots allowing them to acquire moisture at or near the water table Plants in hyperarid habitats have also made behavioral adaptations in order to survive by synchronizing with the seasons of greatest moisture and or coolest temperatures For example desert perennials remain dormant during dry periods of the year then spring to life when water becomes available The book includes many color illustrations and has extensive and up to date references for further reading
