Revolution In Time Clocks The Making O:

Revolution in Time David S. Landes, 2004-02 More than a decade after the publication of his dazzling book on the cultural technological and manufacturing aspects of measuring time and making clocks David Landes has significantly expanded *Revolution in Time* In a new preface and scores of updated passages he explores new findings about medieval and early modern time keeping as well as contemporary hi tech uses of the watch as mini computer cellular phone and even radio receiver or television screen While commenting on the latest research Landes never loses his focus on the historical meaning of time and its many perceptions and uses questions that go beyond history that involve philosophers and possibly theologians and literary folk as well

The World They Made Together Mechal Sobel, 2021-06-08 In the recent

past enormous creative energy has gone into the study of American slavery with major explorations of the extent to which African culture affected the culture of black Americans and with an almost totally new assessment of slave culture as Afro American Accompanying this new awareness of the African values brought into America however is an automatic assumption that white traditions influenced black ones In this view although the institution of slavery is seen as important blacks are not generally treated as actors nor is their divergent culture seen as having had a wide ranging effect on whites Historians working in this area generally assume two social systems in America one black and one white and cultural divergence between slaves and masters It is the thesis of this book that blacks Africans and Afro Americans deeply influenced white s perceptions values and identity and that although two world views existed there was a deep symbiotic relatedness that must be explored if we are to understand either or both of them This exploration raises many questions and suggests many possibilities and probabilities but it also establishes how thoroughly whites and blacks intermixed within the system of slavery and how extensive was the resulting cultural interaction

Stages of History Phyllis Rackin, 1990 Phyllis Rackin offers a fresh approach to Shakespeare s English history plays rereading them in the context of a world where rapid cultural change transformed historical consciousness and gave the study of history a new urgency Rackin situates Shakespeare s English chronicles among multiple discourses particularly the controversies surrounding the functions of poetry theater and history She focuses on areas of contention in Renaissance historiography that are also areas of concern in recent criticism historical authority and causation the problems of anachronism and nostalgia and the historical construction of class and gender She analyzes the ways in which the presence of history in Shakespeare s theater participated and its representation in subsequent criticism still participates in the contests between opposed theories of history and between the different ideological interests and historiographic practices they authorize Celebrating the heroic struggles of the past and recording the patriarchal genealogies of kings and nobles Tudor historians provided an implicit rationale for the hierarchical order of their own time but the new public theater where socially heterogeneous audiences came together to watch common players enact the roles of their social superiors was widely perceived as subverting that order Examining such sociohistorical factors as the roles of women and common men and the conditions of theatrical performance Rackin explores what happened when elite historical discourse was transported to the public commercial theater She argues that Shakespeare s chronicles transformed univocal historical writing into polyphonic theatrical scripts that expressed the contradictions of Elizabethan culture

The Worlds of Villard de Honnecourt: The Portfolio, Medieval Technology, and Gothic Monuments, 2022-12-12 This book charts the past present and future of studies on medieval technology art and craft practices Inspired by Villard s enigmatic portfolio of artistic and engineering drawings this collection explores the multiple facets of medieval building represented in this manuscript Paris Biblioth que nationale de France MS Fr 19093 The book s eighteen essays and two introductions showcase traditional and emergent methods for the study of medieval craft demonstrating how these

diverse approaches collectively amplify our understanding about how medieval people built engineered and represented their world Contributions range from the analysis of words and images in Villard s portfolio to the close analysis of masonry technological marvels and gothic architecture pointing the way toward new avenues for future scholarship to explore Contributors are Mickey Abel Carl F Barnes Jr Robert Bork George Brooks Michael T Davis Amy Gillette Erik Gustafson Maile S Hutterer John James William Sayers Ellen Shortell Alice Isabella Sullivan Richard Alfred Sundt Sarah Thompson Steven A Walton Maggie M Williams Kathleen Wilson Ruffo and Nancy Wu A Cultural History of Work in the Age of Enlightenment Anne Montenach, Deborah Simonton, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities The Enlightenment led to revised ideas about work together with new social attitudes toward work and workers Coupled with dynamism in the economy and the rise of the middling orders work was more frequently perceived positively as a commodity and as a source of social respectability This volume explores the cultural implications of the transition from older systems based on privilege control and embedded practices to a more open society increasingly based on merit and ability It examines how guild controls broke down and political and commercial systems loosened It also considers the theoretical justifications that brought new binding ideas such as the strengthening of ideology on home domesticity for the female and work and politics for the male North America embodied the extremes of these transitions with free workers able to make their way in a society based on ability and initiative while solidifying the ravages of the slavery system A Cultural History of Work in the Age of Enlightenment presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure *The Oxford Handbook of the Protestant Reformations* Ulinka Rublack, 2017 This Handbook takes a broad overview of the Protestant Reformations seeing them as movements which stretched far beyond their European beginnings Written by a team of international scholars of history and theology the contributions offer up to date perspectives on Reformation ideas and the lasting historical impact of Protestantism *The Scientific Way of Warfare* Antoine J. Bousquet, 2022-06-15 Bousquet s landmark book examines the impact of key technologies and scientific ideas on the theory and practice of warfare and the handling of the perennial tension between order and chaos on the battlefield Spanning the entire modern era from the Scientific Revolution to the present it offers a systematic account of modern warfare as the constitution of increasingly complex assemblages of bodies and machines whose integration rests upon a military assimilation of scientific thought Reflecting the pervasive influence of scientific conceptual frameworks upon warfare modern armies have been successively organised by reference to the paradigmatic technologies of the clock engine computer and network Conversely major scientific developments and technological breakthroughs have become intertwined with the experience of war especially since the Second World War s unprecedented mobilisation of scientific rationality and technical expertise This increasingly tight symbiosis between science technology and war is at the heart of both the tremendous powers and enduring pathologies displayed by the contemporary

military machine In this new and revised edition Bousquet extends the analysis to encompass the latest developments in the scientific way of warfare in the midst of renewed great power competition and a wave of technological innovation in artificial intelligence and robotics

Luxury After the Terror Iris Moon, 2022-04-01 When Louis XVI was guillotined on January 21 1793 vast networks of production that had provided splendor and sophistication to the royal court were severed Although the king s royal possessions from drapery and tableware to clocks and furniture suites were scattered and destroyed many of the artists who made them found ways to survive This book explores the fabrication circulation and survival of French luxury after the death of the king Spanning the final years of the ancien r gime from the 1790s to the first two decades of the nineteenth century this richly illustrated book positions luxury within the turbulent politics of dispersal disinheritance and dispossession Exploring exceptional works created from silver silk wood and porcelain as well as unrealized architectural projects Iris Moon presents new perspectives on the changing meanings of luxury in the revolutionary and Napoleonic periods a time when artists were forced into hiding exile or emigration Moon draws on her expertise as a curator to revise conventional accounts of the so called Louis XVI style arguing that it was only after the revolutionary auctions liquidated the king s collections that their provenance accrued deeper cultural meanings as objects with both a royal imprimatur and a threatening reactionary potential Lively and accessible this thought provoking study will be of interest to curators art historians scholars and students of the decorative arts as well as specialists in the French Revolution
