Revolution Now The New Scientific Basis:

Revolution, Now!, the New Scientific Basis Kenyon B. De Greene, 2002-08 **Ignorance, Manipulation, and Enslavement** Kenyon B. Greene, 2007-04-10 This transdisciplinary book deals with the most critical problems now challenging our and our world's survival: human overpopulation, vast environmental destruction, persistent ignorance in spite of purported advances in education, dominance of neoconservative thinking incommensurate with the world's problems, increased religiosity that harks back to the Middle Ages, anti-science thinking, persistent warfare, exhausted and outmoded philosophies of people and Nature, Capitalism gone berserk, and devolution of democracy. These seemingly diverse areas are integrated by the theory of complex systems. Avoiding Pollyannaish optimism, this book is must reading for all people who want to make up their own minds about where we go from here. **Kondratieff Waves, Warfare and World Security** Tessaleno C. Devezas, 2006 Considerable progress has been made in understanding the underlying mechanisms driving the long wave behaviour of the world socioeconomic development. A controversial mechanism discussed is the close relationship between K waves and the outbreak of major wars. **The University** Kenyon B. De Greene, 2008-04-26 The twenty-first century is lurching chaotically into a perilous and uncertain future. Once vibrant and creative, the University now large, anachronistic and bureaucratic, has all but exhausted its capabilities to respond to challenges and threats from within and without. Years of hypocrisy and power politics have taken their toll on the would-be second Caltech. Now everything is going wrong. A cynical attempt to fire a popular young teacher, Alistair Higham, explodes as students, parents, alumni, and the professors' professional organization come to the aid of the teacher. Investigation by the professional organization brings other injustices to light. It seems likely that the University will be censored and will lose its accreditation. The neighborhood around the University rises in protest over the latter's ham-handed attempt to have a block of lower middle-class houses razed to make room for a parking lot. Tight connections with industry make the University a partner in dumping toxic wastes in poor Mexican American neighborhoods and in mining in mountain wildernesses. Eventually a crafty liaison with the oil industry comes to a head as the University is revealed to be an indirect participant in genocide in Quetzalgalpa, a remote and war-ravaged Central American country. **Bulletin of the Atomic Scientists**, 1958-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security.
