

RESEARCH METHODOLOGIES

Research methodologies can roughly be categorized into three groups: quantitative, qualitative, and mixed-methods.

QUALITATIVE RESEARCH

Qualitative research investigates human experiences and behavior through non-numerical data collection and analysis.

QUANTITATIVE RESEARCH

Quantitative research examines relationships between variables using numerical data and statistical techniques.

MIXED METHODS RESEARCH

Mixed methods research combines qualitative and quantitative approaches to provide a more holistic understanding of a research question.

Cultural Sport Psychology and Elite Sport in Singapore Nicholas de Cruz, 2022-05-05 Guided by the principles of cultural sport psychology CSP this book explores the psychosocial issues surrounding elite sport and psychological practice in Singapore CSP recognises the importance of understanding people as individuals rather than objectifying and interpreting psychological processes independent of the socio cultural context in which they stem from For sport psychology to progress it is imperative to distinguish and appreciate the difference between treating someone the same i e culturally blind approach and treating them equally i e possess cultural awareness To address the paucity of cultural specific research this book explores the psychosocial issues of elite sport in Singapore using CSP as a theoretical and guiding philosophy Given Singapore s recent successes at the Olympic and Paralympic levels this book is ideally timed to investigate the social and cultural developments of elite sport as they occur in a specific sociocultural context The authors argue that if elite sport and sport psychology is to progress in Singapore there is a need to refine its elite ecosystem regulate the practice of sport psychology and work towards establishing a professional community centred around a culture of constructive exchange debate and cooperation This book presents a blueprint to any researcher national institute or practitioner to systematically explore the culture and context within which they operate and organise action plans to address unique needs that were identified through this process

Handbook of Survey Methodology for the Social Sciences Lior Gideon, 2012-06-21 Surveys enjoy great ubiquity among data collection methods in social research they are flexible in questioning techniques in the amount of questions asked in the topics covered and in the various ways of interactions with respondents Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results Because they are so commonly used and fairly easy to administer surveys are often thought to be easily thrown together But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive Geared to the non statistician the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation Chapters examine the major survey methods of data collection

providing expert guidelines for asking targeted questions improving accuracy and quality of responses while reducing sampling and non sampling bias Relying on the Total Survey Error theory various issues of both sampling and non sampling sources of error are explored and discussed By covering all aspects of the topic the Handbook is suited to readers taking their first steps in survey methodology as well as to those already involved in survey design and execution and to those currently in training Featured in the Handbook The Total Survey Error sampling and non sampling errors Survey sampling techniques The art of question phrasing Techniques for increasing response rates A question of ethics what is allowed in survey research Survey design face to face phone mail e mail online computer assisted Dealing with sensitive issues in surveys Demographics of respondents implications for future survey research Dealing with nonresponse and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how to clarity for researchers in the social and behavioral sciences and related disciplines including sociology criminology criminal justice social psychology education public health political science management and many other disciplines relying on survey methodology as one of their main data collection tools *The Sage Handbook of Survey Development and Application* Lucy R.
