The Operation of Grace Wolfe Gregory, 2016-12-29 The Operation of Grace collects a decade's worth of essays by Gregory Wolfe taken from the pages of Image the literary journal he founded more than a quarter century ago As he notes in the preface his Image editorials while they cover a wide range of topics focus on the intersection of art faith and mystery Wolfe believes that art and religion while hardly identical offer illuminating analogies to one another art deepening faith through the empathetic reach of the imagination and faith anchoring art in a vision beyond the artist's ego Several essays dwell on how aesthetic values like ambiguity tragedy and beauty enlarge our understanding of the spiritual life There are also a series of reflections that extend Wolfe's campaign to renew the neglected and often misunderstood tradition of Christian humanism Finally there are sections that contain more personal meditations arising from Wolfe's involvement in nurturing and promoting the work of emerging writers and artists The Operation of Grace demonstrates once again why novelist Ron Hansen has spoken of Wolfe as one of the most incisive and persuasive voices of our generation

Make Peace before the Sun Goes Down Roger Lipsey, 2015-05-19 In the 1950s and 60s Thomas Merton a monk of the Trappist monastery of Gethsemani in Kentucky published a string of books that are among the most influential spiritual books of the twentieth century including the mega best seller The Seven Storey Mountain He was something of a rock star for a cloistered monk and from his monastic cell he enjoyed a wide and lively correspondence with people from the worlds of religion literature and politics During that period he also explored and wrote extensively on Buddhism Sufism art and social action The man to whom he owed obedience in the cloistered life was a much more traditional Catholic his abbot Dom James Fox To say that these two men had a conflicted relationship would be an understatement but the tension their differences in orientation brought actually led to creative results on both sides and to a

kind of hard won respect and love Roger Lipsey's portrait of this unusual relationship is compelling and moving it shows Merton in the years his imagination was taking him far beyond the walls of the monastery and eventually literally to Asia

American Catholics and the Church of Tomorrow Catherine R. Osborne, 2018-04-24 In the mid twentieth century American Catholic churches began to shed the ubiquitous spires stained glass and gargoyles of their European forebears turning instead toward startling and more angular structures of steel plate glass and concrete But how did an institution like the Catholic Church so often seen as steeped in inflexible traditions come to welcome this modernist trend Catherine R Osborne's innovative new book finds the answer the alignment between postwar advancements in technology and design and evolutionary thought within the burgeoning American Catholic community A new visibly contemporary approach to design church leaders thought could lead to the rebirth of the church community of the future As Osborne explains the engineering breakthroughs that made modernist churches feasible themselves raised questions that were for many Catholics fundamentally theological Couldn't technological improvements engender worship spaces that better reflected God's presence in the contemporary world Detailing the social architectural and theological movements that made modern churches possible American Catholics and the Churches of Tomorrow breaks important new ground in the history of American Catholicism and also presents new lines of thought for scholars attracted to modern architectural and urban history

The Third Millennium David Walsh, 1999 This provocative meditation on the turn of the millennium explores the significance that a celebration of Christ's birth can have beyond the Christian community Writing from the perspective of Christian philosophy David Walsh ponders the emergence of modern civilization from the medieval Christian past concluding that Christian theology grounds the dominant ideas of modern society He professes the importance and promise of Christianity while rejecting the Gnosticism advocated by Harold Bloom and others that places the divine within the self Affirming Christ's place at the heart of civilization Walsh argues that the Christian faith has relevance beyond its own boundaries for all traditions that find their common ground in reason This contemplative book asserts that the Christian millennial jubilee has meaning for all and that it points the way toward the fullness of life in this world as well as in eternity
