Molendijk, 2016-07-21 This volume offers a the East .1885 critical analysis of one the most ambitious editorial projects of late Victorian Britain the edition of the fifty substantial volumes of the Sacred Books of the East 1879 1910 The series was edited and conceptualized by Friedrich Max M ller 1823 1900 a world famous German born philologist orientalist and religious scholar M ller and his influential Oxford colleagues secured financial support from the India Office of the British Empire and from Oxford University Press Arie L Molendijk documents how the series has become a landmark in the development of the humanities especially the study of religion and language in the second half of the nineteenth century The edition also contributed significantly to the Western perception of the religious or even mystic East which was textually represented in English translations. The series was a token of the rise of big science and textualized the East by selecting their sacred books and bringing them under the power of western scholarship Seeking the Lord of Middle Earth Jeffrey L.
