basic human right and tracks the emergence of mental health prevention and promotion as a global priority Locating mental illness within a cycle of negative causes and effects affecting human quality of life the editors identify modern policy barriers to promotion prevention initiatives particularly the favoring of the biomedical health model by major stakeholders The book s selection of successful programs from diverse countries displays a lifespan approach emphasizing the centrality of interdisciplinary educational settings in providing primary and secondary prevention and promotion interventions and the ongoing fight against missing financial investigations discrimination and stigma Together these papers make a forceful argument for rights based responses to worldwide mental health needs as part of the commitment toward global human rights and long term development goals Included in the coverage Mental health priorities around the world Social determinants of mental health Mental health and stigma aspects of anti stigma interventions Promoting social and emotional wellbeing and responding to mental health problems in schools The promotion and delivery of mental health services in primary care settings Economic evaluation of mental health promotion and mental illness prevention Bringing to the fore public health concerns that are too often marginalized Global Mental Health is necessary reading for health professionals health and clinical psychologists psychiatrists medical sociologists and policymakers

Happiness Across Cultures Helaine Selin,Gareth Davey,2012-02-29 Different cultures experience happiness differently Traditionally the West is considered materialistic and happiness is said to come from achievement and acquisition The East is said to be more people oriented where happiness is a result of deep personal interactions Thus poor people can be happier in the East than the West because they are not so concerned with possession and more with society This book considers happiness and quality of life in non Western countries and cultures Its coverage is diverse and spans the breadth of the non Western world revealing unique perspectives of happiness and life quality embedded in rich cultural traditions and histories

The Perception of Christianity as a Rational Religion in Singapore Clive S. Chin,2017-03-23 This book evaluates the common criticism that Christianity in Asia is westernized Since the 1980s Asian evangelical theologians and missiologists argue that the intrusion of Western theology is responsible for the Western and hence alien expressions of Christianity in Asia Yet in Singapore the number of Christians has increased over the last few decades Empirical evidence demonstrates that younger Chinese Singaporeans convert from Buddhism or Taoism to Christianity partly because they perceive it as a rational religion over Buddhism or Taoism which are viewed as irrational or superstitious Not only do many converts favor Christianity as a rational religion but they do not regard Christianity as a Western religion at the point of their conversion What accounts for those recent developments This study explores the processes of modernization and globalization as important factors impacting religious change in Singapore Personal contextual and structural elements actually influence one s religion of choice In facilitating effective mission one must qualify the use of the categories Asian and Western because religious and cultural boundaries overlap What matters most in missiology is discerning how the gospel of Jesus Christ engages the self

understanding and lived realities of ethnic and religious others in diverse cultural settings **Quality of Life Impairment in Schizophrenia, Mood and Anxiety Disorders** A. George Awad, 2007-06-28

Over the past few decades health related quality of life HRQL has emerged as the new image of medicine viewed from a psychosocial perspective The concept of Quality of Life has attracted a good deal of interest not only from a clinical perspective but also from psychosocial health economics as well as cultural aspects More recently the neurobiological brain substrates that modulate many aspects of subjective experiences which is relevant to quality of life such as affect mood cognition pleasure reward responses as well as feeling of wellbeing and satisfaction has been explored and elucidated Such increased interest in HRQL is highlighted by the large number of recent publications Over the past 10 years at least 350 papers were published describing aspects of HRQL in the psychiatric and mental field Among them 78% dealt with HRQL in schizophrenia and schizoaffective disorders 21% with major depression 14% with anxiety disorders and 4% with bipolar disorder It is gratifying to witness the enhanced interest and popularity in HRQL research and publications yet the field continues to suffer from conceptual inconsistencies as well as a good deal of methodological limitations It is worrisome that we still do not have a clear understanding of the concept itself as applied to mental health and illness as well as the complex array of its determinants Similarly there is a lag in the application of quality of life data in improving clinical practice

Income Inequality in Singapore Pundarik

Mukhopadhyaya, 2014-03-26 The World Bank 1993 conferred on Singapore the status of tiger economy because of its two miraculous characteristics high growth and reduced income inequality Expansion of educational provision is one of the major policies the Government of Singapore followed since 1975 particularly to enrich the human capital endowment of the country which has been crucial to the success of Singapore This book made a coherent study of these extremely important issues to examine the trend and pattern of income inequality in Singapore The book delves further into the trend and pattern of income inequality in Singapore and their implications for the future It attempts to analyse the links between social welfare and inequality in the light of rapid economic growth phase and adduced important policy implications The concepts and methodologies used in this book as well as the novelty of analyses and policy implications make this a coherent and in depth study of extremely important issues with most up to date observations In the last three decades no such book on Singapore has been written and this book fills the gap in existing literature It is a must read for anyone who is interested to learn more about the tiger economy of Singapore

An Introduction to Genetic Engineering, Life Sciences and the Law George Wei, 2002 The moral social economic and legal issues raised by work in the life sciences are immense These include the legal issues that concern the use and abuse of genetic information This book is an introductory survey of the relations between the life sciences and the law

The Value of Life Rune Elvik, 2018-06-11 Research on the monetary value of saving life and limb has produced results most laypeople would regard as nonsensical however researchers continue to try to make sense of these bewildering results and produce new studies An almost forgotten theory of science can explain why this is so Studies

designed to obtain monetary valuations of life and limb have produced extremely diverse results There is no consensus among researchers working in the field about the best research methods or the most credible results of research However this field of study continues to thrive The methodology of scientific research programmes a theory of science developed by the late philosopher Imre Lakatos can help explain why a particular field of study continues to exist despite not producing meaningful or easily interpreted results Readers of the book will gain insight into internal norms of science that guide researchers to continue to pursue studies even if the findings taken at face value contradict the theoretical foundations of the research Scientific theories can be upheld even when the evidence against them seems to be massive
