Kedar,Merry E. Wiesner-Hanks,2015-04-09 Volume 5 of the Cambridge World History series uncovers the cross cultural exchange and conquest and the accompanying growth of regional and trans regional states religions and economic systems during the period 500 to 1500 CE The volume begins by outlining a series of core issues and processes across the world including human relations with nature gender and family social hierarchies education and warfare Further essays examine maritime and land based networks of long distance trade and migration in agricultural and nomadic societies and the transmission and exchange of cultural forms scientific knowledge technologies and text based religious systems that accompanied these The final section surveys the development of centralized regional states and empires in both the eastern and western hemispheres Together these essays by an international team of leading authors show how processes furthering cultural commercial and political integration within and between various regions of the world made this millennium a proto global era *A Global History of Trade and Conflict since 1500* L. Coppolaro,F. McKenzie,2013-11-20 This book explains the causes and consequences of the intersection of two transformative global forces trade and conflict since 1500 The nine historical case studies interspersed over 500 years and spanning the globe make a major historical contribution to the enduring debate about whether trade makes peace more likely *Offshore Asia* Fujita Kayoko,Shiro Momoki,Anthony Reid,2013 This exemplary work of international collaboration takes a comparative approach to the histories of Northeast and Southeast Asia with contributions from scholars from Japan Korea and the Englishspeaking academic world The new scholarship represented by this volume demonstrates that the vast and growing commercial interactions between the

countries of eastern Asia have long historical roots The so called opening to Western trade in the mid nineteenth century which is typically seen as the beginning of this process is shown to be rather the reversal of a relatively temporary phase of state consolidation in the long eighteenth century

Across The Green Sea Sanjay Subrahmanyam, 2024-07-02

Beginning in the mid fifteenth century the regions bordering the western Indian Ocean the green sea as it was known to Arabic speakers underwent vast transformation An era of commercial and cultural exchange blossomed between the Red Sea and Mecca the Persian Gulf East Africa Kerala and western India In Across the Green Sea Sanjay Subrahmanyam recounts the history of this ocean from a variety of shifting viewpoints He sets the scene with the withdrawal of China s Ming Dynasty and explores how the western Indian Ocean was transformed by the growth and increasing prominence of the Ottoman Empire and the continued spread of Islam into East Africa He examines how several cities including Mecca and the vital Indian port of Surat grew and changed during these centuries when various powers interacted until famines and other disturbances upended the region in the seventeenth century Rather than proposing an artificial model of a dominant centre and its dominated peripheries Across the Green Sea reveals the complexity of a truly dynamic and polycentric system through the use of connected histories a method which he has pioneered Imagined Geographies Geoffrey C.

Gunn, 2021-09-03 Imagined Geographies is a pioneering work in the study of history and geography of the pre 1800 world In this book Gunn argues that different regions astride the maritime silk roads were not only interconnected but can also be construed as imagined geographies Taking a grand civilizational perspective five such geographic imaginaries are examined across respective chapters namely Indian Arabic Chinese Japanese and European including an imagined Great South Land Drawing upon an array of marine and other archaeological examples the author offers compelling evidence of the intertwining of political cultural and economic regions across the sea silk roads from ancient times until the seventeenth century Through a thorough analysis of these five geographic imaginaries the author sets aside purely national history and looks at the maritime realm from a broader spatial perspective He challenges the Eurocentric concept of center and periphery and establishes a revisionist view on a decentered world regional history This book will definitely interest history lovers from all around the world who wants to know more about how their forebears viewed their respective region and how their region fits into world history with local uniqueness Gunn takes large themes and makes them understandable He is not afraid to make the grand statement and to look at the sweep of history all in one arc I admire that greatly this is not history for the faint of heart But it is history well done and history that can show the forest from the trees Eric Tagliacozzo John Stambaugh Professor of History Cornell University This is one of the most ambitious and insightful books that I have read on pre Modern maritime Asia The author offers fascinating perspectives on how this vast region was imagined charted and experienced over many centuries That requires mastery of an immense range of scholarship and primary sources His aim is

to knit this watery world together into a conceptual whole This mission is accomplished with style and discipline Andrew R Wilson John A van Beuren Chair of Asia Pacific Studies U S Naval War College **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1968 The World History of Beekeeping and Honey Hunting Eva Crane,1999-10-13 First published in 2000 This comprehensive book represents the first attempt to write a world history of people s use of social bees how bees nests were initially hunted for their honey and wax and later how the bees were kept in purpose made hives Evidence survives from early times in the form of artefacts pictures and written records and also human traditions of dealing with bees Since 1949 the author has had opportunities to travel in over sixty countries and to see traditional and modern hive beekeeping and also honey collection from nests She learned much that helped her to piece together some of the long history in the different continents *Revival: A History of Modern Culture: Volume II (1934)* Preserved Smith,2018-01-16 The understanding of history can be advanced only by the combination or alternation of analysis and synthesis Detailed research and generalizing survey are not antiethical but complementary For a long time however the specialist has reigned supreme in our schools The need is now surely for a return to synoptic writing The present work was undertaken to supply the need of a synthesis It is a map of a large region not a geological chart of a square mile or the plan of a single city Its value if any lies in its view of the interrelations of large tracts of social and intellectual life not in the intensive investigation of narrow fields
