and conversely the impact of humans on rivers They view this dynamic relationship through political cultural industrial social and ecological perspectives in national and transnational settings As integral sources of food and water local and international transportation recreation and aesthetic beauty rivers have dictated where cities have risen and in times of flooding drought and war where they ve fallen Modern Western civilizations have sought to control rivers by channeling them for irrigation raising and lowering them in canal systems and damming them for power generation Contributors analyze the regional national and international politicization of rivers the use and treatment of waterways in urban versus rural environments and the increasing role of international commissions in ecological and commercial legislation for the protection of river resources Case studies include the Seine in Paris the Mississippi the Volga the Rhine and the rivers of Pittsburgh Rivers in History is a broad environmental history of waterways that makes a major contribution to the study preservation and continued sustainability of rivers as vital lifelines of Western culture **Finding the Voice of the River** Gary J.
